			expected to bid the project. Due to the nature of the bid, the Emerson scope of work was a small portion of the total offering. This, due to risk concerns, Emerson could not bid this project as a prime contractor.
F.H. Paschen	Tyler Bassinger	tbassinger@fhpaschen.com	We felt our company was more suited to the Incinerator and Hazmat building projects. Also, as we are a new office, our estimating resources are limited as we grow. The tendency of GLWA to delay/push bid dates on projects sometimes makes it difficult for us to plan our bid schedule to accommodate every GLWA job and still bid work for other Owners with consistent bid dates, such as MDOT. In this case, it was simply having to decide between this job and the other two I mentioned above and which ones we felt played the most to our strengths and presented the best opportunity.
