

RATING ACTION COMMENTARY

Fitch Rates Great Lakes Water Auth's Series 2022 Water System Rev Bonds 'A+'/'A'; Outlook Stable

Mon 22 Aug, 2022 - 5:43 PM ET

Fitch Ratings - Austin - 22 Aug 2022: Fitch Ratings has assigned the following ratings to the obligations issued by the Great Lakes Water Authority, MI (GLWA or the authority):

--Approximately \$121.8 million water supply system revenue senior lien bonds, series 2022A, 'A+';

--Approximately \$83.6 million water supply system revenue second lien bonds, series 2022B, 'A'.

All bonds are scheduled to sell via negotiation the week of Aug. 29, 2022. Proceeds will be used to fund certain water system (the system) capital improvements and pay costs of issuance.

In addition, Fitch has affirmed the following GLWA bonds, including bonds previously issued by the city of Detroit (the city) and the Michigan Finance Authority, MI on behalf of the Detroit Water and Sewerage Department (DWSD) and assumed by GLWA (all pre-refunding):

--\$1.48billion senior lien water supply system revenue bonds at 'A+';

--\$625.0 million second lien water supply system revenue bonds at 'A'.

Fitch has assessed the system's Standalone Credit Profile (SCP) at 'a'.

The Rating Outlook is Stable.

ANALYTICAL CONCLUSION

The 'A+'/'A' bond ratings and the 'a' SCP consider the system's financial profile assessment within the context of very strong revenue defensibility and operating risk profiles. Leverage, measured by Fitch as net

adjusted debt to adjusted funds available for debt service (FADS), finished at approximately 10.0x in fiscal 2021, which was similar to the result last year. Moving forward, projected increases in capital spending could drive leverage incrementally higher, but overall it should remain in line with the current rating.

Fitch's latest calculation of GLWA's historical and projected leverage ratios are lower than its earlier reviews and reflect the recharacterization of certain payments and cash balances, as provided for in its criteria. Historically Fitch has treated lease payments, which are used in part to contribute to DWSD's improvement and extension [I&E] fund, pension obligation payments, and water residential assistance program payments from to DWSD as transfers and operating expenses of GLWA. Further clarification on the dynamics of these payment flows has resulted in the recharacterization of these payments as debt service related to the capitalized lease obligations, which improves FADS.

Additionally, given that a significant portion of DWSD's unrestricted cash originated from these I&E funds, which are held within the trust under the master bond ordinance (MBO), and because these funds can be used to meet debt service if necessary, this balance is now being included as unrestricted cash, lowering net adjusted debt. While both of these recharacterizations improve leverage, these changes alone have no impact on the rating.

The revenue defensibility assessment considers the authority's ability to reallocate any hypothetical shortfalls from a non-performing retail customer to its performing customers via a rate increase, and the overall strength of such customers. While DWSD's credit profile is considered to be just midrange by Fitch, many of the other large customers have much stronger credit profiles, resulting in a strong overall purchaser credit quality (PCQ). The operating risk profile considers the authority's very low cost burden, coupled with its very favorable life cycle ratio.

The notching distinction between the senior and the second-lien bonds reflects the meaningful protection afforded to senior debt given the sizable balance of subordinated obligations, the latter of which include the second-lien bonds, state revolving fund loans, and the long-term leases payable under the lease agreement between DWSD, and the absence of an automatic cross-default or acceleration between the liens. Senior lien debt comprises just over 50% of GLWA's total obligations.

CREDIT PROFILE

GLWA provides wholesale water services to a population of approximately 3.8 million, or 38% of the state population. In Jan. 2016, the authority assumed operational control of Detroit's system assets (excluding its local distribution infrastructure) via a 40-year lease agreement and authorized GLWA the right to set and collect rates from the regional systems' customers historically served by the city. Separately, security interest in the city's system-related revenues was granted under the MBO, while the water and sewer services agreement (WSSA), assigned the city the right to set and collect rates from its retail customers. The agreements required GLWA to assume all liabilities of the regional water and sewer systems, including outstanding indebtedness related to the respective systems.

System assets include five treatment plants that collectively can treat around 1.7 billion gallons per day, an extensive conveyance system and many water-storage reservoirs. Water is supplied to the treatment

plants via the Detroit River, Lake Huron and Lake St. Clair. Supply is robust and more than sufficient for the perpetual needs of the service area.

KEY RATING DRIVERS

Revenue Defensibility 'aa'

Strong Purchaser Credit Quality, Ability to Recover Costs

The authority has the ability to offset any payment shortfalls from any single customer by shifting the shortfall to the remaining customers via a rate increase. Rate setting is not subject to external approval, providing sound rate flexibility. Lastly, the authority's largest suburban members contribute to a strong overall PCQ.

Operating Risks 'aa'

Very Low Operating Cost Burden and Life Cycle Ratios

Cost per million gallons (mg) delivered is very low, as the system's operating cost burden finished at just \$2,327 per mg in 2021. The system's lifecycle ratio is equally favorable at 28%. Capex to depreciation has been below average the last few years but is beginning to ramp up.

Financial Profile 'a'

Mostly Stable Leverage Ratio, Sound Liquidity Profile

The system's leverage ratio has remained stable over the past five years, averaging about 10.2x over this time. Moving forward, capital spending is projected to increase in part due to inflationary pressures, but overall leverage is expected to remain consistent with the current rating. The authority's coverage of full obligations (COFO) and liquidity profile are also sound and therefore neutral to the financial profile assessment.

Asymmetric Additive Risk Considerations

No asymmetric additive considerations affected this rating determination.

RATING SENSITIVITIES

Factors that could, individually or collectively, lead to a positive rating action/upgrade on the authority's revenue bonds:

--Sustained improvements in the leverage ratio to less than 10.0x, assuming stability in the current revenue defensibility and operating risks assessments.

Factors that could, individually or collectively, lead to a negative rating action/downgrade on the authority's revenue bonds:

- Sustained worsening in the leverage ratio in excess of 13.0x;
- Downward revisions to the system's overall PCQ;
- Material declines in liquidity that expose bondholders to the timing risk of the true-up;
- Less than sum-sufficient COFO without offsetting liquidity, per Fitch's criteria;
- The senior-lien rating could converge at the SCP assessment if there is a significant erosion of the financial cushion afforded to senior bondholders that results in a lack of meaningful difference in the probability of payment default between the liens.

Best/Worst Case Rating Scenario

International scale credit ratings of Sovereigns, Public Finance and Infrastructure issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of three notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

SECURITY

Senior-lien bonds are secured by a first lien on net revenues of the system. Second-lien bonds are secured by net revenues after payment of the senior-lien bonds.

Revenue Defensibility

The system's revenue defensibility is very strong, and is assessed at 'aa'. Revenue defensibility is supported by the strength of the various legal agreements between the city and the authority's regional municipal customers, the ability to reallocate costs and the strong weighted-average PCQ of the authority's customers. Favorably, rates are set by the authority's board and are not subject to external approval.

The wholesale agreements for the majority of the authority's regional water municipal customers are based on a 60% fixed-service charge component and a 40% commodity charge, which is reviewed and adjusted annually. Any bad-debt expense from a wholesale customer is charged to other customers via a true-up. Payments are an operating expense of each respective system, senior to any debt service. Most contracts last 30 years with an automatic 10-year renewal and a five-year notice requirement for termination.

After Detroit, which accounted for around 25% of the system's operating revenues (inclusive of the local system operating revenues) in fiscal 2021, the largest municipal customers include the Southeast Oakland County Water Authority (6%), North Oakland County Water Authority (5%), and Sterling Heights (4%).

In the recent past, the city's population experienced annual declines for many years. However, recent estimates indicate that the population has stabilized. Income levels in the city are low (about 50% the US

average), while poverty and unemployment rates are elevated. However, economic measures for the regional members overall are generally in line with or better than state and national averages.

Operating Risks

The system's operating risks assessment of 'aa' is supported by a very low operating cost burden, and a very favorable life cycle ratio. The operating cost burden finished fiscal 2022 at \$2,327/mg, which is well below Fitch's 'aa' threshold of \$6,500/mg. Given the 2015 conveyance of the system assets from the city to GLWA, at which time the authority began newly depreciating infrastructure, the authority's life cycle ratio is very favorable at 28% compared to Fitch's 'aa' threshold of 45%.

Capex-to-depreciation has averaged about 46% over the past five years, a level at which Fitch views as adequate given the favorable life cycle ratio. In accordance with the authority's 2023-2027 CIP, capex is expected to be robust over the next five years, which should sustain the favorable life cycle ratio.

The CIP for the consolidated GLWA and DWSD water systems totals around \$1.2 billion. Given recent inflationary pressures, projected spending is increased over prior years, but costs associated with the CIPs appear manageable overall. Funding is estimated to be provided by debt (approximately 67% of the total) and from other funds on hand.

The goal of GLWA's CIP is implementation of its water master plan. The water plan's primary focus has been the decommissioning of one of the water treatment plants (accounting for over 15% of system capacity) in order to "right size" the system, along with other system optimization. Although this will create upfront costs, longer-term operational efficiencies are expected.

Financial Profile

The system's overall financial profile is strong, and is assessed at 'a'. The system's leverage ratio finished 2021 at about 10.0x, which is consistent with recent history. Senior and all-in debt service coverage finished at 2.0x and 1.4x, respectively, in fiscal 2021. Liquidity has remained very robust over the past five years, most recently finishing at 723 days cash (calculated under Fitch's methodology). The system's sound COFO of around 1.4x and cash balances result in a liquidity profile that is considered neutral to the overall financial profile assessment.

Fitch Analytical Stress Test (FAST)

The five-year scenario produced by FAST considers the potential trend of key ratios in a base and stress case. The stress case is designed to impose a capital cost increase of 10% above expected levels and evaluate potential variability in projected key ratios. Base-case assumptions used by Fitch include the authority's latest forecasts and projected capex for the regional and local system (i.e. DWSD). Revenues are projected at around 4% annually and increases in operational expenses are at 3%, with these together leading to sound FADS improvements starting in fiscal 2023.

Although FADS is projected to improve, the aforementioned higher-planned capex results in increasing leverage in FAST, with the base case peaking in year five at approximately 10.8x and the stress case peaking at 11.2x; both of these levels are consistent with the current ratings. Longer-term projections provided in

the authority's CIP show spending should level off at around 2027, and therefore leverage is expected to remain stable to declining.

Asymmetric Additive Risk Considerations

No asymmetric additive risk considerations affected this rating assessment.

Financial Statement Adjustment Disclosure

In its analysis, Fitch adjusted GLWA's 'Statement of Revenues, Expenses and Changes in Net Position' to include information from DWSD's 'Statement of Revenues, Expenses and Changes in Net Position.' The adjustments are made to provide greater comparability of GLWA's financial position in accordance with the flow of funds under the bond ordinances and lease-related agreements.

Sources of Information

In addition to the sources of information identified in Fitch's applicable criteria specified below, this action was informed by information from Lumesis.

RATING ACTION COMMENTARY

Fitch Rates Great Lakes Water Auth's Ser. 2022 Sewage Revs at 'A+'/'A'; Outlook Revised to Positive

Mon 22 Aug, 2022 - 5:27 PM ET

Fitch Ratings - Austin - 22 Aug 2022: Fitch Ratings has assigned the following ratings to the obligations issued by the Great Lakes Water Authority, MI (GLWA or the authority):

--Approximately \$101.5 million sewage disposal system revenue senior lien bonds, series 2022A, 'A+';

--Approximately \$96.4 million sewage disposal system revenue second lien bonds, series 2022B, 'A';

--Approximately \$96.5 million sewage disposal system revenue refunding senior lien bonds, series 2022C, 'A+'.

Proceeds will be used to fund sewer system capital improvements, to refund certain bonds, and pay costs of issuance. All bonds are scheduled to sell via negotiation the week of Aug. 29, 2022.

In addition, Fitch has affirmed the following GLWA bonds, including bonds previously issued by the city of Detroit (the city) and the Michigan Finance Authority on behalf of the Detroit Water and Sewerage Department (DWSD) and assumed by GLWA (all pre-refunding):

--\$1.79 billion senior lien sewage disposal system revenue bonds at 'A+';

--\$736.4 million second lien sewage disposal system revenue bonds at 'A'.

The system's standalone credit profile (SCP) is assessed at 'a'.

The Rating Outlook is revised from Stable to Positive.

ANALYTICAL CONCLUSION

The 'A+'/'A' bond ratings and the SCP consider the system's financial profile assessment within the context of very strong revenue defensibility and operating risk profiles. Leverage, measured by Fitch as net adjusted debt to adjusted funds available for debt service (FADS), finished at approximately 9.5x in fiscal 2021. The Outlook revision to Positive is based on the system's recent decline in leverage, which was above 10.0x prior to fiscal 2019. Although capital spending is expected to rise given recent inflationary pressure, projected increases in FADS could drive leverage consistently below 10.0x over the next five years, supporting a higher rating.

Fitch's latest calculation of GLWA's historical and projected leverage ratios are lower than its earlier reviews and reflect the recharacterization of certain payments and cash balances, as provided for in Fitch's criteria. Historically Fitch has treated lease payments, which are used in part to contribute to DWSD's improvement and extension [I&E] fund, pension obligation payments, and water residential assistance program payments to DWSD as transfers and operating expenses of GLWA. Further clarification on the dynamics of these payment flows has resulted in the recharacterization of these payments as debt service related to the capitalized lease obligations, which improves FADS.

Additionally, given that a significant portion of DWSD's unrestricted cash originated from these I&E funds, which are held within the trust under the master bond ordinance (MBO), and because these funds can be used to meet debt service if necessary, this balance has now been included as unrestricted cash, lowering net adjusted debt. While both of these recharacterizations improve leverage, these changes alone have no impact on the rating.

GLWA's revenue defensibility assessment considers the authority's ability to reallocate any hypothetical shortfalls from a non-performing customer to its performing customers via a rate increase, and the overall strength of such customers. While Fitch considers DWSD's credit profile midrange, many of the other large customers have much stronger credit profiles, resulting in a strong overall purchaser credit quality (PCQ). The operating risks profile considers the authority's very low cost burden, coupled with its very favorable life cycle ratio.

The notching distinction between the senior and the second-lien bonds reflects the meaningful protection afforded to senior debt given the sizable balance of subordinated obligations, the latter of which include the second-lien bonds, state revolving fund loans, and the long-term leases payable under the lease agreement between GLWA and DWSD, and the absence of an automatic cross-default or acceleration between the liens. Senior lien debt comprises just over 50% of GLWA's total obligations.

CREDIT PROFILE

GLWA provides wholesale sewer services to a population of approximately 2.8 million, or 28% of the state population. In Jan. 2016, the authority assumed operational control of Detroit's system assets (excluding its local distribution infrastructure) via a 40-year lease agreement and authorized GLWA the right to set and collect rates from the regional systems' customers' historically served by the city. Separately, security interest in the city's system-related revenues was granted under the MBO, while the water and sewer services agreement (WSSA), assigned the city the right to set and collect rates from its retail customers. The agreements required GLWA to assume all liabilities of the regional water and sewer systems, including outstanding indebtedness related to the respective systems.

System assets include one wastewater treatment plant that is reportedly one of the largest single-site facilities in the U.S., having a capacity of 1,700 million gallons per day. The treatment plant can accommodate dry-weather flows without further mediation, but also operates eight combined sewer overflow retention treatment basins to accommodate wet-weather flows. Wholesale customers retain ownership in collection system infrastructure which conveys flows and ultimately discharges such flows into GLWA's interceptors.

KEY RATING DRIVERS

Revenue Defensibility 'aa'

Strong Purchaser Credit Quality, Ability to Recover Costs

The authority has the ability to offset any payment shortfalls from any single customer by shifting the shortfall to the remaining customers via rate increases. Rate setting is not subject to external approval, providing sound rate flexibility. Lastly, the authority's largest suburban members contribute to a strong overall PCQ.

Operating Risks 'aa'

Very Low Operating Cost Burden and Life Cycle Ratios

Cost per million gallons (mg) delivered is very low, as the system's operating cost burden finished at just \$3,170 per mg in 2021. The system's life cycle ratio is equally favorable at 28%. Capex to depreciation has been below average the last few years but is beginning to ramp up.

Financial Profile 'aa'

Improving Leverage Ratio, Sound Liquidity Profile

The system's leverage ratio has improved over the past five years. Moving forward, somewhat higher capital spending is offset by increases in FADS and debt amortization, leading to stable-to-incrementally improved leverage. The authority's coverage of full obligations (COFO) and liquidity profile are also sound and therefore neutral to the financial profile assessment.

Asymmetric Additive Risk Considerations

No asymmetric additive considerations affected this rating determination.

RATING SENSITIVITIES

Factors that could, individually or collectively, lead to a positive rating action/upgrade on the authority's revenue bonds:

--Sustained improvements in leverage to below 10.0x, assuming stability in the current revenue defensibility and operating risks assessments.

Factors that could, individually or collectively, lead to a negative rating action/downgrade on the authority's revenue bonds:

--Sustained weakening in the leverage ratio above 13.0x;

--Downward revisions to the system's overall PCQ and/or revenue defensibility assessment;

--Material declines in liquidity that expose bondholders to timing risk of the true-up;

--Less than sum-sufficient COFO without offsetting liquidity, per Fitch's criteria;

--The senior-lien rating could converge at the SCP assessment if there is a significant erosion of the financial cushion afforded to senior bondholders that results in a lack of meaningful difference in the probability of payment default between the liens.

Best/Worst Case Rating Scenario

International scale credit ratings of Sovereigns, Public Finance and Infrastructure issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of three notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit <https://www.fitchratings.com/site/re/10111579>.

SECURITY

Senior-lien bonds are secured by a first lien on net revenues of the system. Second-lien bonds are secured by net revenues after payment of the senior-lien bonds.

Revenue Defensibility

The system's revenue defensibility is very strong, and is assessed at 'aa'. Revenue defensibility is supported by the strength of the various legal agreements between the city and the authority's regional municipal customers, and the strong weighted-average PCQ of these customers. Favorably, rates are set by the authority's board and are not subject to external approval.

The wholesale agreements for the majority of the authority's regional sewer municipal customers are based on a 100% fixed-service charge component, which is reviewed and adjusted annually. Any bad-debt expense from a wholesale customer is charged to other customers via a true-up. Payments from customers are an operating expense of each respective system, senior to any debt service. Most contracts last 30 years with an automatic 10-year renewal and a five-year notice requirement for termination.

After the city, which accounted for around 50% of the system's operating revenues (inclusive of the local system operating revenues) in fiscal 2021, the largest municipal customers include the Oakland-Macomb

Interceptor Drainage District (12%), Wayne County's Rouge Valley (10%), and Oakland County's George Kuhn Drainage District (8%).

In the recent past, the city's population experienced annual declines for many years. However, recent estimates indicate that the population has stabilized. Income levels in the city are low (about 50% the US average), while poverty and unemployment rates are elevated. However, economic measures for the regional members overall are generally in line with or better than state and national averages.

Operating Risks

The system's operating risk assessment of 'aa' is supported by a very low operating cost burden, and a very favorable life cycle ratio. The operating cost burden finished fiscal 2022 at \$3,170/mg, which is well below Fitch's 'aa' threshold of \$6,500/mg. Given the recent conveyance of the system assets from the city to GLWA, at which time the authority began depreciating infrastructure, the authority's lifecycle ratio is very favorable at 27%, compared to Fitch's 'aa' threshold of 45%. Capex-to-depreciation has averaged about 43% over the past five years, but in accordance with the authority's 2023-2027 CIP, capex is expected to be robust over the next five years, which should sustain the favorable lifecycle ratio.

The CIP for the consolidated GLWA and DWSD systems totals around \$985 million. Given inflationary pressure, expected spending has increased over prior years, but costs associated with the CIP appear manageable overall. Funding for the CIP is expected to be provided by approximately 60% debt proceeds and 40% other funds on hand.

The goal of GLWA's CIP is implementation of its sewer master plan. The sewer master plan identifies five outcomes, including focusing on, among other things, public health and safety.

Financial Profile

The system's overall financial profile is very strong, and the assessment has been raised to 'aa' from 'a'. The system's leverage ratio finished 2021 at about 9.5x, which is improved over the 10.8x registered in fiscal 2017. Senior and all-in debt service coverage finished at 2.6x and 1.5x, respectively, in fiscal 2021. Liquidity has remained sound over the past five years, most recently finishing at 283 days cash (calculated using Fitch's methodology). The system's sound COFO of around 1.5x and cash balances result in a liquidity profile that is considered neutral to the overall financial profile assessment.

Fitch Analytical Stress Test (FAST)

The five-year scenario produced by FAST considers the potential trend of key ratios in a base and stress case. The stress case is designed to impose a capital cost increase of 10% above expected levels and evaluate potential variability in projected key ratios. Base-case assumptions used by Fitch are informed by the authority's latest forecasts and projected capex for the regional and local system (i.e. DWSD). Revenues and expenses are projected at around 3%-4% annually.

The higher-assumed capex spend rate is offset by the improving FADS and debt amortization in the scenario, leading to leverage that should remain relatively stable or exhibit modest improvement over the next five years, finally finishing at approximately 9.0x in Fitch's base case and 9.2x in the stress case.

Longer-term projections provided in the authority's CIP show even lower spending in years six through 10, further supporting the trend of lower leverage and the Positive Outlook.

Asymmetric Additive Risk Considerations

No asymmetric additive risk considerations affected this rating assessment.

Financial Statement Adjustment Disclosure

In its analysis, Fitch adjusted GLWA's "Statement of Revenues, Expenses and Changes in Net Position" to include information from DWSD's "Statement of Revenues, Expenses and Changes in Net Position." Fitch also adjusted GLWA's balance sheet to include DWSD's unrestricted cash. The adjustments are made to provide greater comparability of GLWA's financial position in accordance with the flow of funds under the bond ordinances and lease-related agreements.

Sources of Information

In addition to the sources of information identified in Fitch's applicable criteria specified below, this action was informed by information from Lumesis.

REFERENCES FOR SUBSTANTIALLY MATERIAL SOURCE CITED AS KEY DRIVER OF RATING

The principal sources of information used in the analysis are described in the Applicable Criteria.

ESG Considerations

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. ESMA and the FCA are required to publish historical default rates in a central repository in accordance with Articles 11(2) of Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 and The Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019 respectively.

Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further,

ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided “as is” without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the “NRSRO”). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the “non-NRSROs”) and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

SOLICITATION STATUS

The ratings above were solicited and assigned or maintained by Fitch at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

ENDORSEMENT POLICY

Fitch's international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be. Fitch's approach to endorsement in the EU and the UK can be found on Fitch's Regulatory Affairs page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.

Rating Action: Moody's assigns A1 senior & A2 second lien to Great Lakes Water Authority, MI's water revenue bonds; revises outlook to positive

19 Aug 2022

New York, August 19, 2022 -- Moody's Investors Service has assigned an A1 to Great Lakes Water Authority, MI's Water Enterprise's \$121.8 million Water Supply System Revenue Senior Lien Bonds, Series 2022A and A2 to \$83.6 million Water Supply System Revenue Second Lien Bonds, Series 2022B. Moody's also affirmed the A1 senior and A2 second lien ratings on the water system's existing bonds. Moody's also revised the authority's outlook to positive from stable. After the current sale, the water system will have about \$1.6 billion of senior lien and \$700 million of second lien revenue bonds outstanding.

RATINGS RATIONALE

The A1 senior lien water rating reflects the authority's strong operating performance that continues to result in solid annual debt service coverage and robust liquidity. The system is very large, serving the bulk of the Detroit metro area and almost a third of the state's population. Outstanding revenue bonds enjoy sound legal protections and the system has independent rate-setting authority. Member communities, however, recently publicly pushed back on a rate increase aimed at paying the bad debt of Highland Park. This is unlikely to instigate future rate disputes and ultimately resulted in the city of Highland Park beginning to make sewer payments again. The system's debt burden is high and a large share of system-wide revenue is generated by retail operations within the City of Detroit (Ba2 positive).

The A2 second lien rating reflects a subordinate claim on pledged net revenue.

RATING OUTLOOK

The outlook is positive because the authority has strong management and stable operations and its underlying service area continues improve, particularly in the City of Detroit, as well as across Wayne (A3 positive), Oakland (Aaa stable) and Macomb (Aa1 stable) counties.

FACTORS THAT COULD LEAD TO AN UPGRADE OF THE RATINGS

- Sustained expansion and diversification of the service area's economic base
- Growth in revenue that continues to outpace borrowing so as to moderate leverage of pledged resources

FACTORS THAT COULD LEAD TO A DOWNGRADE OF THE RATINGS

- Renewed economic stress that pressures revenue trends
- Material reduction to the system's liquidity or debt service coverage ratios
- Material growth in leverage

LEGAL SECURITY

Water revenue bonds are backed by the net revenue of the system. The rate covenant requires projected net revenue coverage of debt service equal to 120% for senior lien bonds, 110% for second lien bonds and 100% for any subordinate lien debt. Per the master bond ordinance, projected net revenue includes the revenue of the respective systems plus any estimated revenue increase from approved rate increases.

The money collected from regional wholesale and local retail customer payments are deposited to a lockbox, which is administered by a third-party trustee. Operations and maintenance (O&M) expenses are defined as cash transfers made to GLWA's and DWSD's respective O&M funds. The revenue and O&M expenses related to GLWA is reported in its segregated business funds while the revenue and expenses of DWSD are accounted for in Detroit's water and sewer funds, respectively. The bifurcated accounting requires adjustments

from reported figures to assess rate covenant coverage under the master bond ordinance.

Senior and second lien bonds benefit from debt service reserve funds (DSRF) sized at the lesser of the standard three-prong test.

USE OF PROCEEDS

Proceeds will fund capital improvements Great Lakes Water Authority's regional water system, including improvements for water treatment and transmission.

PROFILE

The Great Lakes Water Authority (GLWA) is the regional wholesale provider of water and sewer services to southeast Michigan (Aa1 stable). The water enterprise treats water from Lake Huron, Lake St. Clair and the Detroit River and distributes treated water to a service area population of about 3.8 million. The sewer enterprise collects, treats and disposes of wastewater produced by a service area population of about 2.8 million. GLWA is an incorporated municipal authority, established in 2016, operating under the guidance of a six-member board, consisting of one appointee each of the counties of Macomb (Aa1 stable), Oakland (Aaa stable), and Wayne (A3 positive), two appointees of the Mayor of Detroit and one of the Governor of Michigan.

METHODOLOGY

The principal methodology used in these ratings was US Municipal Utility Revenue Debt Methodology published in April 2022 and available at <https://ratings.moodys.com/api/rmc-documents/386721>. Alternatively, please see the Rating Methodologies page on <https://ratings.moodys.com> for a copy of this methodology.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found on <https://ratings.moodys.com/rating-definitions>.

For ratings issued on a program, series, category/class of debt or security this announcement provides certain regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series, category/class of debt, security or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the credit rating action on the support provider and in relation to each particular credit rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the issuer/deal page for the respective issuer on <https://ratings.moodys.com>.

The ratings have been disclosed to the rated entity or its designated agent(s) and issued with no amendment resulting from that disclosure.

These ratings are solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website <https://ratings.moodys.com>.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Moody's general principles for assessing environmental, social and governance (ESG) risks in our credit analysis can be found at https://ratings.moodys.com/documents/PBC_1288235.

The Global Scale Credit Rating on this Credit Rating Announcement was issued by one of Moody's affiliates outside the EU and is endorsed by Moody's Deutschland GmbH, An der Welle 5, Frankfurt am Main 60322, Germany, in accordance with Art.4 paragraph 3 of the Regulation (EC) No 1060/2009 on Credit Rating Agencies. Further information on the EU endorsement status and on the Moody's office that issued the credit

rating is available on <https://ratings.moodys.com>.

The Global Scale Credit Rating on this Credit Rating Announcement was issued by one of Moody's affiliates outside the UK and is endorsed by Moody's Investors Service Limited, One Canada Square, Canary Wharf, London E14 5FA under the law applicable to credit rating agencies in the UK. Further information on the UK endorsement status and on the Moody's office that issued the credit rating is available on <https://ratings.moodys.com>.

Please see <https://ratings.moodys.com> for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the issuer/deal page on <https://ratings.moodys.com> for additional regulatory disclosures for each credit rating.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation

("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.

MOODY'S

INVESTORS SERVICE

Rating Action: Moody's assigns A1 senior & A2 second lien to Great Lakes Water Authority, MI's sewer revenue bonds; revises outlook to positive

19 Aug 2022

New York, August 19, 2022 -- Moody's Investors Service has assigned an A1 to Great Lakes Water Authority, MI's Sewer Enterprise's \$101.5 million Sewage Disposal System Revenue Senior Lien Bonds, Series 2022A and \$10.6 million Sewage Disposal System Revenue Refunding Senior Lien Bonds, Series 2022C and an A2 to its \$96.4 million Sewage Disposal System Revenue Second Lien Bonds, Series 2022B. Moody's also affirmed the A1 senior and A2 second lien ratings on the sewer system's existing bonds. Moody's also revised the authority's outlook to positive from stable. After the current sale, the sewer system will have about \$1.8 billion of senior lien and \$800 million of second lien revenue bonds outstanding.

RATINGS RATIONALE

The A1 senior lien sewer rating reflects the authority's strong operating performance that continues to result in solid annual debt service coverage and robust liquidity. The system is very large, serving the bulk of the Detroit metro area and almost a third of the state's population. Outstanding revenue bonds enjoy sound legal protections and the system has independent rate-setting authority. Member communities, however, recently publicly pushed back on a rate increase aimed at paying the bad debt of Highland Park. This is unlikely to instigate future rate disputes and ultimately resulted in the city of Highland Park beginning to make sewer payments again. The system's debt burden is high and a large share of system-wide revenue is generated by retail operations within the City of Detroit (Ba2 positive).

The A2 second lien rating reflects a subordinate claim on pledged net revenue.

RATING OUTLOOK

The outlook is positive because the authority has strong management and stable operations and its underlying service area continues improve, particularly in the City of Detroit, as well as across Wayne (A3 positive), Oakland (Aaa stable) and Macomb (Aa1 stable) counties.

FACTORS THAT COULD LEAD TO AN UPGRADE OF THE RATINGS

- Sustained expansion and diversification of the service area's economic base
- Growth in revenue that continues to outpace borrowing so as to moderate leverage of pledged resources

FACTORS THAT COULD LEAD TO A DOWNGRADE OF THE RATINGS

- Renewed economic stress that pressures revenue trends
- Material reduction to the system's liquidity or debt service coverage ratios
- Material growth in leverage

LEGAL SECURITY

Sewer revenue bonds are backed by the net revenue of the system. The rate covenant requires projected net revenue coverage of debt service equal to 120% for senior lien bonds, 110% for second lien bonds and 100% for any subordinate lien debt. Per the master bond ordinance, projected net revenue includes the revenue of the respective systems plus any estimated revenue increase from approved rate increases.

The money collected from regional wholesale and local retail customer payments are deposited to a lockbox, which is administered by a third-party trustee. Operations and maintenance (O&M) expenses are defined as cash transfers made to GLWA's and DWSD's respective O&M funds. The revenue and O&M expenses related to GLWA is reported in its segregated business funds while the revenue and expenses of DWSD are

accounted for in Detroit's water and sewer funds, respectively. The bifurcated accounting requires adjustments from reported figures to assess rate covenant coverage under the master bond ordinance.

Senior and second lien bonds benefit from debt service reserve funds (DSRF) sized at the lesser of the standard three-prong test.

USE OF PROCEEDS

Proceeds will fund capital improvements Great Lakes Water Authority's regional sewer system, including for wastewater treatment, interceptor system and pump station improvements and to reduce combined sewer overflows.

PROFILE

The Great Lakes Water Authority (GLWA) is the regional wholesale provider of water and sewer services to southeast Michigan (Aa1 stable). The water enterprise treats water from Lake Huron, Lake St. Clair and the Detroit River and distributes treated water to a service area population of about 3.8 million. The sewer enterprise collects, treats and disposes of wastewater produced by a service area population of about 2.8 million. GLWA is an incorporated municipal authority, established in 2016, operating under the guidance of a six-member board, consisting of one appointee each of the counties of Macomb (Aa1 stable), Oakland (Aaa stable), and Wayne (A3 positive), two appointees of the Mayor of Detroit and one of the Governor of Michigan.

METHODOLOGY

The principal methodology used in these ratings was US Municipal Utility Revenue Debt Methodology published in April 2022 and available at <https://ratings.moodys.com/api/rmc-documents/386721>. Alternatively, please see the Rating Methodologies page on <https://ratings.moodys.com> for a copy of this methodology.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found on <https://ratings.moodys.com/rating-definitions>.

For ratings issued on a program, series, category/class of debt or security this announcement provides certain regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series, category/class of debt, security or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the credit rating action on the support provider and in relation to each particular credit rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the issuer/deal page for the respective issuer on <https://ratings.moodys.com>.

The ratings have been disclosed to the rated entity or its designated agent(s) and issued with no amendment resulting from that disclosure.

These ratings are solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website <https://ratings.moodys.com>.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Moody's general principles for assessing environmental, social and governance (ESG) risks in our credit analysis can be found at https://ratings.moodys.com/documents/PBC_1288235.

The Global Scale Credit Rating on this Credit Rating Announcement was issued by one of Moody's affiliates outside the EU and is endorsed by Moody's Deutschland GmbH, An der Welle 5, Frankfurt am Main 60322, Germany, in accordance with Art.4 paragraph 3 of the Regulation (EC) No 1060/2009 on Credit Rating Agencies. Further information on the EU endorsement status and on the Moody's office that issued the credit

rating is available on <https://ratings.moodys.com>.

The Global Scale Credit Rating on this Credit Rating Announcement was issued by one of Moody's affiliates outside the UK and is endorsed by Moody's Investors Service Limited, One Canada Square, Canary Wharf, London E14 5FA under the law applicable to credit rating agencies in the UK. Further information on the UK endorsement status and on the Moody's office that issued the credit rating is available on <https://ratings.moodys.com>.

Please see <https://ratings.moodys.com> for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the issuer/deal page on <https://ratings.moodys.com> for additional regulatory disclosures for each credit rating.

Update to credit analysis

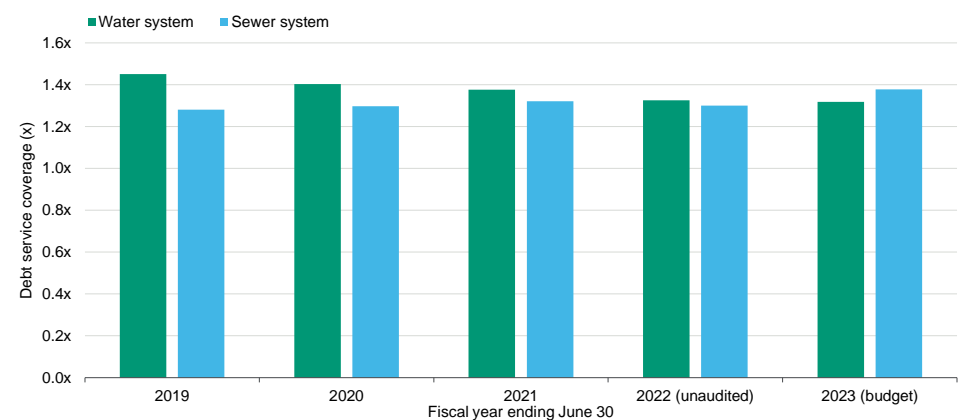

Summary

The [Great Lakes Water Authority's](#) (GLWA) [water](#) and [sewer](#) enterprises (both senior liens rated A1 positive; both subordinate liens rated A2 positive) have solid credit profiles, bolstered by very large service areas and a sizable scale of operations. GLWA has effectively balanced its hefty capital needs with an affordable rate structure, stable operating performance, consistent debt service coverage (see exhibit 1) and good liquidity for both systems since its inception in 2016. The systems have above-average leverage, however, and the [City of Detroit](#) (Ba2 positive) makes up a significant portion of their service area.

Building greater resilience to extreme wet-weather events will likely be an ongoing challenge. In the summer of 2021, the Detroit metropolitan statistical area (MSA) had extreme rainfall and flooding, which resulted in property damage and numerous claims for the authority. As with other [Midwestern flooding events](#), federal assistance has been critical in preventing material credit deterioration for impacted issuers. GLWA has not paid any claims to date because an independent investigation found the basement flooding was the result of heavy rain and not a defect in the system.

On August 18, we revised the authority's outlook to positive and affirmed its A1 senior and A2 subordinate lien ratings.

Exhibit 1

Annual debt service coverage has remained relatively adequate for both systems
 Coverage for total senior lien, second lien and junior lien revenue debt service

Figures shown on a GAAP-basis.
 Source: Moody's Investors Service

Credit strengths

- » Very large utility systems, providing essential water and wastewater services to a substantial portion of the state's population
- » Commitment to annual revenue enhancements to support sound debt service coverage and healthy liquidity
- » Track record of strong budget management and good transparency

Credit challenges

- » Debt service coverage, while adequate, trails higher-rated large utilities
- » High leverage will moderate slowly given outstanding capital needs and plans to issue additional debt
- » Increasing occurrence of extreme wet weather events placing strain on stormwater and sewer treatment capacity in certain segments of the system

Rating outlook

The outlook is positive because the authority has strong management and stable operations and its underlying service area continues improve, particularly in the City of Detroit, as well as across [Wayne](#) (A1 stable), [Oakland](#) (Aaa stable) and [Macomb](#) (Aa1 stable) counties.

Factors that could lead to an upgrade

- » Sustained expansion and diversification of the service area's economic base
- » Growth in revenue that continues to outpace borrowing so as to moderate leverage of pledged resources

Factors that could lead to a downgrade

- » Renewed economic stress that pressures consumption and revenue trends
- » Material reduction to the water or sewer system's liquidity or debt service coverage ratios
- » Growth in leverage of the water or sewer system's net revenue

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody.com> for the most updated credit rating action information and rating history.

Profile

The Great Lakes Water Authority (GLWA) is the regional wholesale provider of water and sewer services to southeast [Michigan](#) (Aa1 stable). The water enterprise treats water from Lake Huron, Lake St. Clair and the Detroit River and distributes treated water to a service area population of about 3.8 million. The sewer enterprise collects, treats and disposes of wastewater produced by a service area population of about 2.8 million. GLWA is an incorporated municipal authority, established in 2016, operating under the guidance of a six-member board, consisting of one appointee each of the counties of [Macomb](#), [Oakland](#), and [Wayne](#), two appointees of the Mayor of Detroit and one of the Governor of Michigan.

Detailed credit considerations

Service area and system characteristics: very large service area in southeast Michigan

The systems will continue to benefit from large service areas with broad and diverse customer bases. The regional water supply system covers 1,698 square miles in southeast Michigan, providing treated water to 112 communities and roughly 40% of the state's population. The sewer system is a little smaller; covering 944 square miles, providing wastewater services to about a third of the state's population across 79 communities.

The bulk of water and sewer revenue comes from wholesale contracts with suburban communities. Wholesale contracts generate roughly three quarters of water revenue and a little over half of sewer revenue. Detroit residents and businesses are retail customers of the Detroit Water and Sewerage Department (DWSD), which manages the system assets within the city as an agent of GLWA. The revenue generated within the City of Detroit is assigned to GLWA and is deposited directly with the bond trustee.

GLWA's water usage rates, like many systems, have fallen somewhat over the past several years because of conservation efforts and the region's stagnant population. While that trend will likely stabilize, it is unlikely to materially reverse without an expansion of the system.

Debt service coverage and liquidity: financial metrics likely to remain solid

Both systems will likely continue to maintain adequate annual debt service coverage and ample liquidity because of management's close monitoring of revenue targets and its ability to set rates. The authority has budgeted for 1.3x total debt service coverage for both water and sewer revenue bonds in fiscal 2023. While this coverage level is adequate, it is below other large systems. The authority had initially approved a 3.7% water rate increase and a 2.4% sewer rate increase for fiscal 2023. A portion of the increase was to recover bad debt accrued by the City of Highland Park (unrated), which [has historically had financial challenges](#) and has not been fully paying its water and sewer bill. Many of the authority's member communities publicly pushed back on this portion of the rate increase and sent letters to the governor asking for the state to intervene. Highland Park has now resumed making payments after a state court required the city to continue its sewer payments. The authority and the city are now in mediation and this portion of the specific rate increases were then dropped. The annual revenue impact for GLWA is pretty low: Highland Park's estimated bad debt expense for fiscal 2023 is about \$1.3 million for the water system and \$2.4 million for the sewer. The rate dispute was primarily about equity between member communities and, consequently, is unlikely to instigate future rate disputes.

The authority reports roughly 1.3x coverage of total senior lien, second lien and junior lien debt service for fiscal 2022 (see exhibit 1).

The authority limits the annual growth in its water and sewer system revenue requirements to 4% to maintain a more affordable rate structure and it assumes 3% growth in its operating expense forecasts. Most revenue in both systems comes from fixed monthly wholesale charges (roughly 60% in the water system and 100% in the sewer), which enhances revenue reliability and dependability.

Liquidity

Liquidity is strong for both systems and will remain so despite planned spending for capital investments in fiscal 2022, particularly in the water system (Exhibit 4). Unrestricted cash and investments in the water system were roughly \$416 million and about \$359 million in the sewer system at the close of fiscal 2021. The two funds also have significant restricted cash assets held for budget stabilization, debt service and capital.

Exhibit 4
Days cash on hand is strong for both systems, particularly the water enterprise

Source: Moody's Investors Service

Debt and legal covenants: high debt burden will remain level with sustained revenue growth

Each system has a very high debt burden that will remain elevated because of high capital needs. Leverage metrics will likely remain stable because GLWA has control over its rates and it plans to finance a portion its CIP with cash. The CIP for fiscal 2023 through 2027 includes about \$966 million of water projects and \$762 million of sewer projects. The water system is currently issuing about \$121.8 million of senior lien bonds and \$83.6 million of second lien bonds. The sewer system is issuing \$101.5 million of new money senior lien bonds as well as \$10.6 million of senior lien refunding bonds and \$96.4 million of second lien bonds.

The systems have a variety of capital needs, including reducing combined sewer overflow (CSO) and enhancing transmission and storage. The system will also likely need to build greater resilience to extreme wet-weather events over the long-term. Favorably, the systems are not operating under any federal or state consent decrees. The authority has historically had high nonrevenue water volume because of pipe leaks and breaks. Over the past five years, the authority has materially improved its percentage of water loss and other nonrevenue water down to 10.6% in fiscal 2021 from 19.3% in 2017.

The water and sewer systems' long-term debt leverage across all liens is materially higher than [sector medians](#) (Exhibit 5). GLWA had about \$5.2 billion of combined total revenue debt outstanding at the end of fiscal 2021, about \$2.3 billion for the water system and \$2.9 billion for the sewer.

Exhibit 5
Leverage metrics are much higher than US medians for both the water and sewer systems

Latest medians are for fiscal 2019
 Source: Moody's Investors Service

Legal security

Water and sewer revenue bonds are backed by the net revenue of the respective systems. Legal provisions are solid and are the same for both systems. The rate covenant requires projected net revenue coverage of debt service equal to 120% for senior lien bonds, 110% for second lien bonds and 100% for any subordinate lien debt. Per the master bond ordinance, projected net revenue includes the revenue of the respective systems plus any estimated revenue increase from approved rate increases.

The money collected from regional wholesale and local retail customer payments are deposited to a lockbox, which is administered by a third-party trustee. Operations and maintenance (O&M) expenses are defined as cash transfers made to GLWA's and DWSD's respective O&M funds. The revenue and O&M expenses related to GLWA is reported in its segregated business funds while the revenue and expenses of DWSD are accounted for in Detroit's water and sewer funds, respectively. The bifurcated accounting requires adjustments from reported figures to assess rate covenant coverage under the master bond ordinance.

Senior and second lien bonds benefit from debt service reserve funds (DSRF) sized at the lesser of the standard three-prong test.

Debt structure

All of GLWA's water revenue debt and most of its sewer bonds are fixed rate. The sewer system has one series of variable rate debt: its Series 2006D bonds. The bonds are floating rate notes, are fully callable and make up a little less than 10% of sewer debt. The bonds do not have any demand risk. Interest rates are reset quarterly based upon a formula using a three-month LIBOR rate.

The water system held about 44% of total GLWA debt at the end of fiscal 2021, with roughly \$1.5 billion of senior lien bonds, \$653 million of second lien water revenue bonds and \$71 million of junior lien state revolving fund (SRF) loans. The remainder is held by the sewer system, inclusive of \$1.8 billion of senior lien bonds, \$736 million of second lien sewer revenue bonds and \$411 million junior lien state revolving fund (SRF) loans. The debt service schedule is front-loaded and the bulk of both system's debt matures over the next 15 years.

Debt-related derivatives

The GLWA is not party to any derivative agreements.

Pensions and OPEB

GLWA employees are participants in a defined contribution benefit plan. There are some former DWSD employees who were hired by GLWA that qualify for accrued pension benefits from the City of Detroit's frozen defined benefit General Retirement System (GRS). Pursuant to the City of Detroit's bankruptcy plan of adjustment, GLWA will contribute annually to GRS through fiscal 2023 to accelerate amortization of the GRS unfunded liability associated with GLWA's agreed share, which was based on the liability determined to be associated with the regional system before GLWA began operations. A little less than half of the annual GRS payment is considered O&M, making it effectively senior to debt service. GLWA's allocated contribution was roughly \$31.9 million in fiscal 2021.

Beyond 2023, the GLWA's payments to GRS will be based on the actuarial needs of the plan and sized to amortize any unfunded liability associated with GLWA's agreed upon share that is still remaining. GLWA makes no payments toward accrued retiree healthcare liabilities because the City of Detroit's bankruptcy settlement eliminated those benefits. GLWA established a new defined-contribution retiree healthcare savings plan, resulting in no potential unfunded liability.

ESG considerations

Environmental

[Environmental considerations](#) are a material credit consideration for the systems. Climate change and extreme weather may have operational impacts, particularly on the sewer system. Major wet weather events, like those that occurred during the summer of 2021, can overwhelm the system's ability to store and process infiltration, causing detrimental impacts such as sewer backups and discharges because of CSOs.

The water system benefits from access to a vast amount of relatively easily treatable fresh water. The sewer system includes one of the largest single-site wastewater treatment plants in the world and treated water discharged from the plant is often cleaner than the surrounding water in the receiving body. Both systems are subject to extensive regulation pursuant to the federal Clean Water Act, the Clean Air Act, the Michigan Natural Resources and Environmental Protection Act and various administrative rules and regulations. The authority is in material compliance with all existing permits relating to the operation of the regional water and sewer systems.

Social

[Social considerations](#) such as population, labor force, income and education are material and can impact each system's underlying economy, customer base, financial and leverage metrics. Population in the Detroit MSA grew a little over 2% between 2010 and 2020. The system's sizable service area and customer base provides a high level of diversity, balancing social challenges in portions of the customer base, such as high poverty areas in the City of Detroit. GLWA provides payment and conservation assistance to low-income retail customers through its Water Residential Assistance Program, which helps to avoid delinquencies and support revenue stability.

Governance

GLWA was created in the aftermath of the Detroit bankruptcy. It obtained possession and control of the city's water supply and sewage disposal systems via regional system leases (effective January 1, 2016) for an initial 40-year term and replaced the city as the obligor on all outstanding debt obligations related to the systems, pursuant to bondholder consent. Pursuant to the lease, the City of Detroit has irrevocably assigned its right, title and interest in all revenue of the sewer and water enterprises to GLWA. The lease will automatically extend to correspond with scheduled repayment of newly issued revenue debt. All revenues of both systems were assigned to GLWA.

GLWA is governed by a six-member board. The board has full authority to set service charges on municipal customers. Rates charged to retail customers in the City of Detroit are established by the city's Board of Water Commissioners pursuant to an agency agreement with GLWA. The lease agreement grants the GLWA board the ability to override the city's authority of retail rates and collections should the city not make adjustments sufficient to meet annual revenue requirements. All wholesale customers retain responsibility for levying local charges sufficient to cover costs charged by GLWA. Pursuant to the memorandum of understanding between GLWA and DWSD, GLWA assumes an annual increase of not more than 4% in the revenue requirements through fiscal 2025.

GLWA has demonstrated strong budget management since its inception, enhancing operational efficiencies and regional cooperation. Each year GLWA conducts an extensive study of both its wholesale service charges and allocated annual revenue requirement to retail customers, with the purpose of adjusting revenue to reflect the cost of operations, depreciation expense and return on the rate base. Additionally, since system capacity exceeds demand, management is de-rating parts of its water treatment plants. This allows the water system to reduce capital costs while preserving flexibility to put the facilities back to use.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.

Credit Highlights

- S&P Global Ratings assigned its 'AA-' rating to the Great Lakes Water Authority (GLWA), Mich.'s sewage disposal system revenue senior-lien bonds series 2022A, its 'AA-' rating to GLWA's sewage disposal system revenue refunding senior-lien bonds series 2022C, and its 'A+' rating to GLWA's sewage disposal system revenue second-lien bonds series 2022B.
- At the same time, S&P Global Ratings affirmed its 'AA-' and 'A+' ratings on GLWA's existing senior- and second lien bonds outstanding, respectively.
- The outlook is stable.

Security

The bonds are secured by a statutory lien on pledged assets of the system, pursuant to both the bond ordinance and Michigan Act 94 of 1933 (as amended), and prioritized by the lien status. Pledged assets include net revenues of GLWA's sewage disposal system, along with investments credited to the sewage disposal system and earnings on those investments. The net revenue pledge is constituted from gross revenues of the DWSD retail and the GLWA regional systems, which cover both systems' operating and maintenance (O&M) expenses. A rate covenant stipulates that the GLWA board set rates to produce at least 1.2x coverage of senior-lien debt, 1.1x for second-lien bonds, and 1x for junior-lien bonds. The ability to issue additional bonds exists if net revenues for the previous fiscal year, or net revenues adjusted by approved rate increases and system expansion for the current or next fiscal year, produce coverage of maximum annual debt service (MADS; including the proposed bonds) of at least those levels indicated in the rate covenant for the particular liens.

There is also a debt service reserve (DSR) for both senior- and second-lien bonds, equal to MADS for senior-lien and average annual debt service for second-lien, in all cases no more than what is permitted by the Internal Revenue Code of 1986. On achieving senior-lien ratings from two credit rating agencies no lower than 'AA-' or the equivalent, GLWA,

through amendments to the master bond ordinance (MBO), has the option to eliminate this reserve requirement on its outstanding and future bonds on any lien. If the DSRs are eliminated, we currently view the effects as credit neutral given the significant amounts of unrestricted liquidity GLWA currently carries. If management decides to liquidate the DSRs, we would seek to understand how it would use other pledged funds to continue minimizing the potential for debt payment disruptions. At the fiscal year ended June 30, 2021, the senior-lien DSR totaled \$114.1 million and the second- plus junior-lien DSRs totaled \$48.1 million; DSR investments consist of cash, securities, and sureties.

Credit overview

For a utility of its size, serving about 2.8 million people, we consider the existing financial benchmarks of debt service coverage (DSC) and unrestricted liquidity consistent for the rating category. We would note, however, that in our analysis of DSC, our fixed-charge coverage analysis generally follows the presentation in GLWA's master bond ordinance (MBO) calculation for junior-lien DSC, with additional revenue offsets due to pension payments made to Detroit for its frozen general retirement system expenses and additional fixed costs due to pension note payments made to Detroit for its B and C note payments. Our calculation focuses on how net revenues are covering all of GLWA's fixed costs instead of reporting coverage based on MBO definitions of operating and nonoperating expenses. The effects of this treatment lowers fixed-charge coverage by about five-to-ten basis points compared to MBO junior-lien DSC.

However, Detroit's recovering employment base still has weak underlying fundamentals, in our view, with median household effective buying income only about 50% of the national average. Still, the rating is supported by a revenue base that is well diversified geographically beyond the city limits (75% from suburban wholesale customers).

An overall worsening in U.S. economic conditions (see "U.S. Recession—Are We There Yet?": published Aug. 2, 2022, on RatingsDirect), higher inflation, and higher interest rates could weaken GLWA's capital and operating budget, potentially pressuring water rates. Because account delinquencies within the DWSD retail customer class are already high, worsening economic conditions could reduce revenue collections; GLWA management reports that about 45% of DWSD's 334,000 active retail accounts are 60 days or more delinquent, but that figure has been generally slowly declining since at least 2020.

A number of key provisions in the lease agreement, service agreement, and memorandum of understanding (MOU) between GLWA and Detroit support the ability of the GLWA regional system to help make the net revenues originating from Detroit's local system more predictable despite these economic and collection risks:

- GLWA sets revenue requirements for DWSD that are related to the costs for providing services, and, in turn, Detroit sets retail rates in a fashion that meets GLWA's revenue requirement.
- Explicit language that requires all revenues collected by Detroit be held in segregated accounts in trust and remitted within five days of receipt to a trustee-held pledged revenue account under the MBO.
- A services agreement between GLWA and Detroit that holds the city to performance and administrative standards to maintain its agency relationship with GLWA for rate-setting and revenue collection.
- Requirements that both GLWA and Detroit retail maintain a biennial budget and a five-year capital improvement plan (CIP).
- DWSD is required to submit periodic budget and operational reporting requirements to GLWA and discuss these

results at a Reconciliation Committee, which is also the initial mechanism to develop a plan for DWSD to cure any budget shortfalls. If they occur, then the MOU between GLWA and DWSD describes a workout mechanism to recover the budget shortfalls over a period no longer than the next three fiscal years.

Additional overall credit strengths that we believe will continue to support the rating include:

- A revenue stream that arises from 100% fixed-cost recovery not dependent on volume.
- Active management of governance risks through formal working relationships with both suburban wholesale customers and DWSD. Coordination of all aspects of the utility's operations are managed, including environmental compliance, asset management, procurement, rate-setting, two separate bill assistance programs, and future capital needs.

Environmental, social, and governance

We evaluate the environmental, social, and governance (ESG) risks that could influence our credit rating analysis by considering the economic aspects of the service area in which GLWA operates, as this can generate customer demand and affect revenue collections. We consider governance risk a key credit factor, while social and environmental risk are neutral in our analysis.

Minimizing governance risk lies primarily in maintaining collaboration with both suburban wholesale customers and DWSD management while minimizing litigation risks due to disputes with Highland Park. All these efforts require considerable staff resources, but these efforts also are credit supportive as long as GLWA is able to continue providing its services without significant customer discord that disrupts revenue collections.

Many procedures involving DWSD regarding capital and budget planning, management of budget variances, sharing of services to gain efficiencies, and reporting requirements are built into key documents to which GLWA and the city of Detroit are party. The "One Water Partnership" between GLWA and its suburban wholesale customers generally facilitates information sharing, capital project coordination, and technical assistance.

Litigation with Highland Park has been ongoing for decades, but the bad debt expense has been recovered in service charges to other customers. However, it is our understanding that the bad debt expense recovered from other customers is used as a short-term stop-gap, GLWA works to recover the revenues, and then reimburses the customers to whom the bad debt expense was allocated. If the Highland Park litigation (or additional, future litigation) is not resolved, we believe that the willingness to support these reallocated bad debt expenses could wane, especially since utilities that support these costs do not receive any direct benefit; it's solely a contractual requirement. In this case, our view of governance risk could become a credit weakness.

GLWA has significant social risks to manage given the wide diversity in economic and demographic bases served by the utility. We consider social risks credit neutral, but both GLWA and DWSD management will need to continue balancing implementation of assistance programs while also achieving higher collection rates within Detroit. GLWA's Water Residential Assistance Program (WRAP) is designed to both provide bill assistance and arrange for household water audits to all qualified residents within municipalities that have adopted it (currently including Detroit). DWSD management has a dedicated shut-off program implemented by an outside contractor but it is currently on hold until the end of 2022; it also just launched an additional lifeline program for residents in Detroit that supplements WRAP.

Both programs are supported from revenues generated from water and sewer rates.

We view environmental risks to be credit neutral, with the most acute potential risk being exposure to Polyfluoroalkyl Substances (PFAS) regulation that could affect discharge requirements. One positive recent outcome related to environmental risks is that GLWA was released from an administrative consent order with the Michigan Department of Environment, Great Lakes, and Energy for monitoring of sewer treatment facility operations and biosolids handling; the order had been in place prior to Detroit's bankruptcy. Also of note is that GLWA maintains a strong record of discharge permit and combined sewer overflow compliance.

Outlook

The stable outlook reflects our expectation that GLWA will continue its steady financial performance while funding all its needed capital projects without being impaired by economic headwinds or inflationary pressures. Because GLWA's CIP is not currently regulatory driven, we believe that flexibility to shift capital spend targets and/or revenue requirements due to economic or inflationary pressures will help minimize downside risks to meeting or outperforming currently projected financial projections. However, if compliance costs associated with PFAS remediation or other discharge requirements accelerate, it could influence our view of the GLWA's credit quality.

We would also expect management to continue its collaborative efforts with both suburban customers and DWSD to minimize ESG risks that could have a negative influence on credit quality.

Downside scenario

Continuing to implement the provisions of the lease agreement, service agreement, and MOU that help make the budget for both DWSD and GLWA more predictable while minimizing revenue fluctuations are key factors in maintaining the current rating; if these become less robust, then we would likely lower the rating.

But even if these practices continue, the rating or outlook could be weakened if actual financial performance falls below current projections. Significant deferral of capital projects, considering the current inflationary environment, that artificially increases liquidity but causes deferred maintenance could also lead to downside pressure on the rating or outlook.

Upside scenario

If economic recovery in Detroit continues and starts to have meaningful positive effects on its economic fundamentals and utility collection rates, then the rating could be improved. We also would consider upward rating potential if GLWA meaningfully outperforms its current forecast while still funding its CIP generally as planned. We would also need to consider these improvements as sustainable over a long-term horizon for us to consider doing so.

The Content shall not be used for any unlawful or unauthorized purposes. S&P and any third-party providers, as well as their directors, officers, shareholders, employees or agents (collectively S&P Parties) do not guarantee the accuracy, completeness, timeliness or availability of the Content. S&P Parties are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, for the results obtained from the use of the Content, or for the security or maintenance of any data input by the user. The Content is provided on an "as is" basis. S&P PARTIES DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs or losses caused by negligence) in connection with any use of the Content even if advised of the possibility of such damages.

Credit-related and other analyses, including ratings, and statements in the Content are statements of opinion as of the date they are expressed and not statements of fact. S&P's opinions, analyses and rating acknowledgment decisions (described below) are not recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security. S&P assumes no obligation to update the Content following publication in any form or format. The Content should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. S&P does not act as a fiduciary or an investment advisor except where registered as such. While S&P has obtained information from sources it believes to be reliable, S&P does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives. Rating-related publications may be published for a variety of reasons that are not necessarily dependent on action by rating committees, including, but not limited to, the publication of a periodic update on a credit rating and related analyses.

To the extent that regulatory authorities allow a rating agency to acknowledge in one jurisdiction a rating issued in another jurisdiction for certain regulatory purposes, S&P reserves the right to assign, withdraw or suspend such acknowledgment at any time and in its sole discretion. S&P Parties disclaim any duty whatsoever arising out of the assignment, withdrawal or suspension of an acknowledgment as well as any liability for any damage alleged to have been suffered on account thereof.

S&P keeps certain activities of its business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain business units of S&P may have information that is not available to other S&P business units. S&P has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

S&P may receive compensation for its ratings and certain analyses, normally from issuers or underwriters of securities or from obligors. S&P reserves the right to disseminate its opinions and analyses. S&P's public ratings and analyses are made available on its Web sites, www.standardandpoors.com (free of charge), and www.ratingsdirect.com (subscription), and may be distributed through other means, including via S&P publications and third-party redistributors. Additional information about our ratings fees is available at www.standardandpoors.com/usratingsfees.
