I am writing to demand immediate accountability for the May 10, 2026 water main failure in Auburn Hills. Thousands of residents and businesses have been devastated. I demand: full compensation for all affected parties, public explanation of the 4-day silence between May 6-10, an independent infrastructure audit, and a rate freeze until accountability is established. The community is watching. This is not acceptable. There is a pattern of silence and mismanagement at the GLWA. I'll be contacting my local and state government officials to demand that they hold GLWA accountable

Ken Jarzynski
