Revision Date:
N/A

Revision#:
0

Document Title:
Vendor Response Follow-up

Document Owner/Department:
Procurement Team

Contract No./Title: 2003330 – HVAC and Odor Control Improvements – Oakwood CSO Facility and Pump Station
Date: 5/3/2021

Vendor	Contact Name	Email Address	Explanation of No Bid Submittal
Rotor Electric Co	Benjamin Rosenberg	brosenberg@rotorelectric.com	We bid the job to the General Contractors as an Electrical Subcontractor.
Wood, PLC	David Agnew	David.Agnew@woodplc.com	we do instrumentation and controls. We are not a general contractor. For this specific project, we would be acting as a subcontractor and would not be bidding directly. Secondly, we do not have the resources to perform the Ovation Programming portion of the project
DLZ	Gordon Horn	ghorn@dlz.com	I am with DLZ, a partner with AECOM on the CIP program. DLZ is not a contractor. I am on Bonfire for information only
Forberg Smith	Mike Wright	Mike.wright@forbergsmith.com	We did quote our products through another integrator who will be incorporating our products in the final construction
HDR, Inc.	Tamara Bishop	Tamara.bishop@hdrinc.com	As a design firm, HDR does not provide construction services, however, we often review GLWA bid postings to stay informed about active GLWA projects.
J. F. Cavanaugh	Jerry Schmitt	jerry@jfcav.com	JFC Company self-preforms process piping and equipment. When it comes to bidding work where JFC is not involved (self-preforming work)– we have found that we are not competitive
PCI LLC	Hassan Ajami	hajami@pci-vetrix.com	PCI provided proposals for the I&C scope as a subcontractor.
HySafe Fall Protection	Frank Elmi	FEI@hysafe.com	I did bid the fall protection portion of the project, to 6 GCs
Doublejack Electric	Ian Nash	iann@doublejackelectric.com	Doublejack Electric submitted proposals to mechanical and general contractors that were bidding on the Oakwood CSO project as prime contractors. Due to the nature of that project being predominantly mechanical equipment, we decided to go after it as a subcontractor.

Emerson	Raymond Card	Raymond.card@emerson.com	Emerson responded to the inquiry. Emerson bid the subject project as a subcontractor
E.W. Ensroth Coompany	Geoff Kimmel	kimmelga@ewensroth.com	Ensroth submitted a proposal on this RFP for the Mechanical HVAC scope of work to the General Contractor(s) that requested pricing from us on our self-perform work. We could not assemble a full bid scope to GLWA due to the magnitude of other trade work involved that we do not self-perform.
Air Design Incorporated	Andrew Webster	awebster@airdesign.com	We provided an equipment price to the contractor, who provided a bid to GLWA. We don't provide installation pricing.
Barton Malow	Svabik, Greg	Greg.Svabik@bmco.com	This project is very limited in scope to mostly HVAC. Barton Malow Company self-performs a lot of varied work – concrete, structural steel, reinforcing steel, millwrights, boiler makers, and interior trades. But we don't employ any trades for HVAC. We would only be a broker on this project.
Hazen and Sawyer	Tiffany Nation	tnation@hazenandsawyer.com	Hazen was the selected engineer for this project and this was the construction bid project. Hazen does not provide general contracting services
