

Vendor Response Follow-up

Owner: Great Lakes Water Authority (GLWA)

Contract No.: 1900516

Title: Energy Management: Freeze Protection Pump Installation at Imlay Pumping Station

Proposal Due Date: July 12, 2019

Vendor	Contact Name	Email Address	Explanation of No Bid Submittal
Ross Valve Mfg.	Zakary Hughes	zak@rossvalve.com	They are a manufacturer and we have supplied pricing directly to the contractors to include in their proposals to GLWA
Alfred Benesch & Company	Peck-Hee Wee	PWee@benesch.com	Clark Construction Company is the general contractor on this project with primary design service by Alfred Benesch & Company
Forberg Scientific, Inc.	Mike Wright	wright@forberg.com	They are an instrumentation supplier and the scope did not call for the instruments they represent
Weiss Construction Company, LLC	Joe Mulville	jmulville@weiss-construction.com	Unable to secure a teaming agreement with an engineering consultant to partner with. All of the firms they contacted felt the project was too small to pursue for a design build delivery.
Superior Construction Co., Inc.	Kathleen East	KEast@superiorconstruction.com	This did not fit within our bid schedule.
Wade Trim	Trude Noble	TNOBELE@Wade-Trim.com	They did not feel this project was a good match for their firm at this time.
Testing Engineers & Consultants, Inc.	Nanette Rose	nrose@tectest.com	They were unable to secure a team in order to respond to the scope of the project.
WSP Michigan, Inc.	James Rydquist	James.Rydquist@wsp.com	They did not plan to propose on this. The downloads that were done were a cursory review of what is being planned for the project. It was their understanding this was a design/build project which required a contractor to

				lead and also had a mandatory site visit that WSP didn't attend.
Arcadis of Michigan, LLC	Mike Halwani	Mike.Halwani@arcadis.com		
Signature Contracting Group	John Szarama	jszarama@signaturecontractinggroup.com		They are an industrial painting contractor. Didn't believe there was any painting involved.
NTH Consultants	Lisa Dilg	LDilg@nthconsultants.com		This was a solicitation for a design/build contractor, and they were not approached by any interest contractors.
Rotor Electric Co.	Benjamin Rosenberg	BRosenberg@rotorelectric.com		They will participate as a subcontractor to Clark Construction.
OHM Advisors	Erin Valmont	Erin.Valmont@ohm-advisors.com		They are a subcontractor to Commercial Contracting Corporation
Detroit Contracting Engineering, Inc.	Nafa Khalaf	nkhalaf@dcien.com		Since it was a special item and they do not have deep experience, they decided not to bid the project.
Northwest Pipe Company	Geoff Stieler	gstieler@nwpipe.com		They did provide a material quote to one of the bidders of the project. However, they are a steel pipe manufacturer (not a general contractor) and therefore wouldn't submit a proposal directly to GLWA.
ROWE Professional Services Company	Jeff Markstrom	jmarkstrom@rowepsc.com		They did not submit a proposal because the RFP states that GLWA was looking for a "design build contractor" and ROWE is an engineering consultant.
MBA Distributing Inc. & The Water Associates	Matt Hurst	mhurst@mbadist.com		They are a valve supplier.
Niles Industrial Coatings, LLC	Chad Christensen	chadchristensen@nilesindustrial.com		They are a painting contractor.
Anderson, Eckstein and Westrick, Inc.	Ashley L. Dawson	adawson@aeinc.com		They felt that although they were definitely capable of performing the

			work, they don't currently have the relationship with GLWA necessary to be selected.
Cornerstone Controls	Bill Hunter	Wmhunter02@aol.com	They are an equipment supplier who sell to the various mechanical and electrical contractors. They do bid to GLWA direct on material and service needs, but not installed contracts.
Barton Malow Company	Greg Svabik	Greg.Svabik@bartonmalow.com	They did not provide a proposal for two (2) reasons. 1. This was a design/build project. Due to the smaller dollar value of this project, they were unable to find a teaming design partner. 2. It appeared this project was mostly a mechanical project, and some of the mechanical contractors that would use as a subcontractor were considering providing a proposal for this project as their own general contractor.
Hamlett Engineering Sales Co. DBA HESCO Group, Inc.	Heather Walker	heather.walker@hesco-mi.com	They are a manufacturer's rep firm and provided pricing to the contractors to be carried in their bid package.
FK Engineering Associates	Fritz Klingler	fklinger@fkengeering.com	Most of the work was outside their area of expertise.
Ebara Pumps Americas Corporation	John Cook	jcook@pumpsebara.com	They are a pump supplier not a General Contractor or EPC firm.
