Organization (if applicable):

Please provide comments: In June, July 24, 25, 26, 2024 There was a

leakage of water into the ground in Detroit. Due to neglect

of the water main system, it caused a lot of damage

to the city and the people living there. The city

has not been able to fix the problem and the people

are still suffering from the damage. The city should

be held responsible for the damage and the people

should be compensated for the damage. The city

should be held responsible for the damage and the

people should be compensated for the damage.

The city should be held responsible for the damage

and the people should be compensated for the damage.

The city should be held responsible for the damage

and the people should be compensated for the damage.

The city should be held responsible for the damage

and the people should be compensated for the damage.

The city should be held responsible for the damage

and the people should be compensated for the damage.

The city should be held responsible for the damage

and the people should be compensated for the damage.

The city should be held responsible for the damage

and the people should be compensated for the damage.

The city should be held responsible for the damage

and the people should be compensated for the damage.

The city should be held responsible for the damage

GLWA.ORG

Having GLWA Never Did Compensate People who
Loss thousands of Dollars in property and filled
out forms as requested with receipts But never
received any funds for damages Caused By
The Flood of July 2024. After years
of study GLWA had the audacity to say it was
NOT their fault. They said this to make it
easier for law suits against them, to not be
liable.

No need to speak,
but would like my
Comments to be associated
w/ rate increases

Water is a human right. Let's make sure everyone has access to truly affordable & clean water.
Please provide comments: Our residents cannot continue to afford rate increase upon rate increase.
We need true water affordability that will help keep water flowing & would actually bring
more money into the system. ^{by raising the rates on those already suffering} We need to be innovative & find other ways to improve our
infrastructure. We cannot continue to charge our residents who are already struggling. The tap

Please provide comments: In previous years, GLWA and HP's impact
water bills as a major factor in rate increases. Now that the HP
issue has been resolved, why are rate increases higher than
ever?
