

GLWA's FY 2019 - 2023 Capital Improvement Plan

*GLWA CIP Committee Meeting
December 15, 2017*

Agenda

- **CIP Introduction & CIP Changes**
 - Overview
 - New to the Process This Year
- **CIP Relationship to Financial Plan**
- **Wastewater Engineering**
 - General Strategy in Selecting Projects
 - Top Projects
- **Systems Control Center & Field Services**
 - General Strategy in Selecting Projects
 - Top Projects
- **Future Enhancement, Timing & Next Steps**
 - Likely Enhancements for Next Year
 - CIP Roll-out & Approval Schedule
 - Next Steps

Overview

What is a CIP?

What are we trying to Accomplish?

Major elements of the plan

Contents	
I. Overview	i-1
SECTION 1 GREAT LAKES WATER AUTHORITY	i-1
1.1. Powers of the Authority	i-2
1.2. Governance and Board Members	i-2
1.3. Executive Leadership Team	i-3
1.4. Service Area and Customer Relationships	i-3
SECTION 2 CIP STRATEGY	i-3
2.1. Funded Portion of the Programs	i-4
SECTION 3 LARGEST DOLLAR PROJECTS (GREATER THAN \$30M)	i-5
3.1. Water	i-5
3.2. Wastewater	i-5
3.3. Other	i-5
SECTION 4 2019 PROJECTED SPEND (GREATER THAN \$5M)	i-7
4.1. Features	i-7
4.2. ROVAL PROCESS	i-1
4.3. ENDAR	i-2
4.4. CASE EVALUATION	i-2
4.5. Prioritization	i-2
4.6. Committee	i-3
4.7. Finance Document	i-3
4.8. FEATURES	i-4
4.9. Status Description	i-4
4.10. Categories	i-5
4.11. DRT FORMAT	i-5
4.12. Progress of Project Detail	i-5
4.13. Project Categories & Numbering	i-6
4.14. Purpose	i-6
4.15. Business Unit Overview	i-8
SECTION 5 2019 CIP CHANGES	i-9
5.1. CIP Database	i-9
5.2. Project Risk Matrix	i-9
5.3. Cost Estimation Classifications	i-9
5.4. Innovation, Master Plan, Right-Sizing, Redundancy & NE WTP Related Projects	i-10
5.5. Program & Allowance Project "Carve Outs"	i-11
5.6. Project Year-to-Year Comparison	i-11
5.7. Project Phase Schedule	i-11
SECTION 6 INTRODUCTION	ii-1
6.1. CIP Financial Plan	ii-1
6.2. REVIEW AND ANALYSIS	ii-2
6.3. Cost Allocation to Customer Charges	ii-2
6.4. CIP Funding Based on Estimated Useful Life	ii-3
6.5. Project Status Analysis	ii-4
6.6. Project Category Analysis	ii-6
6.7. Total CIP Requests Compared to the Financial Plan	ii-6
6.8. CIP Financial Plan	ii-6
SECTION 7 CIP SUMMARY	iv-1
7.1. SECTION 1 HIGHLIGHTS	iv-1
7.2. Possible Innovative Projects	iv-1
7.3. Master Plan Right-Sizing Projects	iv-1
7.4. Redundancy Projects	iv-2
7.5. Northeast Water Treatment Plant Repurposing Related Projects	iv-2
SECTION 8 5-YEAR CIP SUMMARY TABLES	iv-3
8.1. Project Prioritization and risk evaluation	v-1
SECTION 9 PROJECT MANAGER CRITERIA	v-3
9.1. SCORES: WATER	v-3
SECTION 10 PROJECT MANAGER CRITERIA	v-5
10.1. SCORES: WASTEWATER	v-5
SECTION 11 PROJECT MANAGER CRITERIA	v-8
11.1. SCORES: WASTEWATER	v-8

What is the Capital Improvement Plan?

- Five year planning document
- Requires alignment with our overall Financial Plan
- Includes large new projects or effectively gives new useful life for long-lived assets
- Long-lived means the asset has a useful life greater than 20 years
- Compilation of projects from all areas of the organization
- Used by Financial Services Area to understand when we need to issue bonds

What We Are Trying to Accomplish

- Increased redundancy, reliability & resiliency of water and wastewater systems
- Adherence with long-term planning document recommendations
- Provide opportunity for stakeholders to provide input
- Best-in-class planning and execution of capital program
 - Efficient spending
 - Planning of human resource needs
 - Planning of financial resource needs

Major Elements of the Plan

I. Overview

- GLWA incorporation, powers, governance, board members, management team, customers and service area
- CIP Strategy
- Summaries of Largest Dollar Projects

GLWA Great Lakes Water Authority

Contents

I. Overview	
SECTION 1 GREAT LAKES WATER AUTHORITY	I-1
1.1. Powers of the Authority	I-1
1.2. Governance and Board Members	I-2
1.3. Executive Leadership Team	I-3
1.4. Service Area and Customer Relationships	I-4
SECTION 2 CIP STRATEGY	I-5
2.1. Funded Portion of the Programs	I-5
SECTION 3 LARGEST DOLLAR PROJECTS (GREATER THAN \$30M)	I-6
3.1. Water	I-7
3.2. Wastewater	I-7
SECTION 4 LARGEST 2019 PROJECTED SPEND (GREATER THAN \$8M)	I-7
4.1. Water	I-1
4.2. Wastewater	I-2
II. Development & Features	
SECTION 1 APPROVAL PROCESS	II-2
SECTION 2 CALENDAR CASE EVALUATION	II-2
SECTION 3 BUSINESS DEVELOPMENT	II-3
3.1. Project Prioritization	II-3
3.2. Review Committee	II-4
3.3. BCE Guidance Document	II-5
SECTION 4 KEY FEATURES	II-5
4.1. Project Status Description	II-5
4.2. Phase Categories	II-5
4.3. CIP Types	II-5
SECTION 5 REPORT FORMAT	II-6
5.1. Varying Degrees of Project Detail	II-6
5.2. Revised Project Categories & Numbering	II-6
5.3. General Purpose	II-8
5.4. Programs	II-8
5.5. Navigation	II-8
5.6. CIP and Business Unit Overview	II-8
SECTION 6 2019 CIP CHANGES	II-9
6.1. CIP Database	II-9
6.2. Project Risk Matrix	II-9
6.3. Cost Estimations Classifications	II-10
6.4. Innovation, Master Plan Right-Sizing, Redundancy & NE WTP Related Projects	II-11
6.5. Program & Allowance Project "Carve Outs"	II-11
6.6. Project Year-to-Year Comparison	II-11
6.7. Project Phase Schedule	II-11
III. CIP Financial Plan	
SECTION 1 INTRODUCTION	III-2
SECTION 2 SUMMARY	III-2
2.1. Cost Allocation to Customer Charges	III-2
2.2. CIP Funding Based on Estimated Useful Life	III-4
2.3. Project Status Analysis	III-6
2.4. Project Category Analysis	III-6
2.5. Total CIP Requests Compared to the Financial Plan	IV-1
2.6. CIP Financial Plan	IV-1
IV. CIP Summary	
SECTION 1 HIGHLIGHTS	IV-1
1.1. Possible Innovative Projects	IV-2
1.2. Master Plan Right-Sizing Projects	IV-2
1.3. Redundancy Projects	IV-3
1.4. Northeast Water Treatment Plant Repurposing Related Projects	V-1
SECTION 2 5-YEAR CIP SUMMARY TABLES	V-1
2.1. Project Prioritization and risk evaluation	V-3
V. PROJECT MANAGER CRITERIA	
SECTION 1 PROJECT MANAGER CRITERIA	V-5
SECTION 2 PROJECT MANAGER CRITERIA	V-5
SECTION 3 PROJECT MANAGER CRITERIA	V-8

Version 1 - Implementation schedule subject to change.

Major Elements of the Plan

II. CIP Development and Features

- CIP Approval Process
- Calendar of Critical Milestones
- Business Case Evaluation (BCE) Development Process
- Key Features & Report Format
- 2019 CIP Changes

Major Elements of the Plan

III. CIP Financial Plan

- **General Overview of the GLWA Financial Plan and the Relationship to the CIP**
- **Summary of the CIP Financial Plan Review & Analysis**

Major Elements of the Plan

IV. CIP Summary

- **Highlighted Project Categories**
 - ✓ **Innovation**
 - ✓ **Master Plan Right-Sizing**
 - ✓ **Redundancy**
 - ✓ **Northeast Water Treatment Plan Repurposing**
- **Line item reporting for each of the 3 major categories; Water, Wastewater and Central Services**
- **Rolled-up by Cost Center**

Major Elements of the Plan

V. Project Prioritization & Risk Evaluation

- **Project Prioritization Criteria**
- **Water & Wastewater High Level Risk Analysis**
- **Project Prioritization Ranking**

Major Elements of the Plan

VI. Projects By Category

- **Individual Listing of Each Project**
 - ✓ **2019-2023 Projected Expenditures**
 - ✓ **Complete Project Projected Expenditures**
- **Description of Asset Types Included Within Each Cost Center**

Major Elements of the Plan

VII. Project Descriptions

- **Individual Project Summaries “One-Pagers”**

VIII. Glossary

VIII. Appendices

New to the Plan For This Year

New To The Plan – Project Database

- Internal GLWA Database Development
 - Allows for Project Managers and Engineers to enter data directly
 - Easily generates queries for reporting
 - Easily generates Project Summaries and full Business Case Evaluations (BCE)

LH WTP Replacement of Filter Instrumentation and Raw Water Flow M

Project Summary | Project Information | Ref. Doc.s | 2018 CIP Expenses | Phase Overview | Expenses (Lifetime Through FY17) | E

PROJECT SUMMARY

☐ Innovation
☐ MP Right Sizing
☐ System Reliability

Project Status

Active

Project Status Guide:

Active: One or more phases have started.

New: First appearance in CIP.

Future Planned: No Phases have started.

Cancelled-Closed: All Phases have been completed.

Pending Closeout: Project at Substantial Completion.

Archived: Project closed or completed.

Reclassified: Projects that have been moved to another category.

Project Title

LH WTP Replacement of Filter Instrumentation and Raw Water Flow M

Project Significance

The filter instrumentation and raw water metering at the Lake Huron WTP is non-functional. Replacement of this equipment is needed for reliable plant operation.

Year Added: 2014

Date Original BCE Prepared: 6/26/2014

Date BCE Last Updated: 9/15/2017

Project Engineer/Manager: Todd King

Title: Director - Field Services

Phone: (313) 926-8114

Email: Todd.King@glwater.org

Manager: Grant Gartrell

Managing Dept: Water Eng

CIP Type: Project

Budget: Water

Project Classification Level 1: Water

Project Classification Level 2: Treatment Plants & Equipment

Project Classification Level 3: Lake Huron

Fund: 5519

Cost Center: 882111

Accounting Useful Life: >20

New To The Plan – Project & Program Information

- Project Year-to-Year Comparison

Describe Here the Changes from the 2018 CIP to 2019 CIP

moved back one year for the construction start; adjusted cost up to account for revised engineering cost estimate due to 30% design completion and more scope definition since last CIP update; added GLWA costs.

1,000s OF DOLLARS

New To The Plan – Cost Estimate Classification

- Cost Estimate Classifications
 - American Association of Cost Engineering (AACE)
International system for classifying cost estimates.
 - Use a standard method to manage expectations related to the accuracy of the project phase (i.e. consultant/contractor contracts)

AACE Cost Estimate Classes		
Estimate Class	Project Definition	Method
Class 5	0% to 2%	Judgement, trend analysis, parametric
Class 4	1% to 15%	Expert opinion, trend analysis, more parametric
Class 3	10% to 40%	Combinations of detailed, unit cost, activity-based + class 4 & 5 methods
Class 2	30% to 70%	Primarily deterministic
Class 1	50% to 100%	Deterministic

CIP Alignment With The Financial Plan

Wastewater Engineering Projects

[illegible]

Strategy In Wastewater Engineering Project Selection

- Add Redundancy Where Prudent and/or Economical
- Improve Reliability to Maintain Compliance
- Increase Process Efficiency

CIP Number: **216007**

Old CIP No.: 1402

Project Title: **DTE Primary Electric 3rd Feed Supply to WRRF**

Project Status: Future Planned

☐ Innovation

Budget: Wastewater

☐ MP Right Sizin

Classification Lvl 1: Wastewater

☐ System Reliability

Classification Lvl 2: WRRF

Classification Lvl 3: General Purpose

Review Committee Project Score: 82.8

The new 3rd 120/13.8 kV Transformer installed and owned by the Great Lakes Water Authority waiting for the 3rd Primary Electric Feed Line to be installed and energized

Project Significance: GLWA's WWTP will have a redundant primary electrical service to power the WRRF equipment.

Project Engineer/Manager: Phillip Kora

Manager: Philip Kora

Scope of Work: The scope of this design-build project includes design and construction of 3rd 120 kV primary electric supply transmission line owned by DTE tapping into the 120-kV Waterman-Zug line in the vicinity of Dearborn St. and Copland St right-of-way at Tower 1368. The design-build services also include securing the property right-of-way easements from the property owners, as well as the design and construction of power transmission supply line. This primary transmission power line will energize the already installed new 120-13.8 industrial substation owned by GLWA near EB-1.

Challenges: Negotiation with private property owners and testing of the automatic switch over will require co-ordination with operations.

CIP Number: **215001**

Old CIP No.: 1384

Project Title: **CSO FACILITIES IMPROVEMENT PROGRAM (Reclassified)**

Project Status: Reclassified

☐ Innovation

Budget: Wastewater

☐ MP Right Sizin

Classification Lvl 1: Wastewater

☐ System Reliability

Classification Lvl 2: WRRF

Classification Lvl 3: CSO RTB & SDF

Review Committee Project Score:

Retrofitted chemical feed pump replacement at Puritan-Fenkell RTB and makeshift wooden stairs to enter Basin Valve Gallery

Project Significance: PROJECT RECLASSIFIED TO CIP 260600. This program is being established to facilitate the study, design, construction administration, and construction of improvements necessary to maintain the facilities which contribute to the CSO Control Program and compliance herewith.

Project Engineer/Manager: Chris Nastally

Manager: Chris Nastally

Scope of Work: This program is intended to include studies, design, construction administration, and construction projects which serve to improve process areas or functions of the CSO Facilities. The overall scope of this program is to facilitate improvements to the disinfection systems, screening systems, facility automation, safety systems, flushing systems, instrumentation & controls, electrical systems, various buildings systems (HVAC, lighting, etc.), and other miscellaneous improvements identified at the facilities throughout the life of this program. The primary drivers of these improvements will be obsolescence/end of service life, excessive O&M problems, reliability, efficiency and system standardization which arise from feedback from operation & maintenance, the scheduled replacement plan, and the needs assessment.

Challenges: As this program starts off, there is a lot of design RFPs in the beginning which will lead to large scale construction projects in the later years (3-5). A significant challenge to be faced will be maintaining the CSO facilities in current operations without the benefit of large-scale improvements of the CSO Systems. Another significant challenge of this program will be unforeseen conditions that may

CIP Number:	211005		
Old CIP No.:	1287		
Project Title:	WRRF PS No. 2 Improvements Phase II		
Project Status:	Active	<input type="checkbox"/> Innovation	
Budget:	Wastewater	<input type="checkbox"/> MP Right Sizin	
Classification Lvl 1:	Wastewater	<input type="checkbox"/> System Reliability	
Classification Lvl 2:	WRRF		
Classification Lvl 3:	Primary Treatment		
Review Committee Project Score:	72.8		
Project Significance:	This project will improve the pump reliability of PS-2 to meet the NPDES permit flow capacity requirements.		
Project Engineer/Manager:	Alfredo Lava		
Manager:	Ali Khraizat		
Scope of Work:	<p>The preliminary scope of this project is to provide basis of design (study) report for rehabilitation/rebuilding plan for existing pump and its control and any associated equipment. The study will look into the addition of VFD to the three constant speed pumps. The study will not be limited to increasing the capacity of existing pumps to meet the long-term goal for wet weather capacity. The Scope also include: Provide engineering design for rehabilitation/rebuilding of the pumps, replacement of HVAC System, I&C Improvements (i.e. automation, etc.), structural, architectural and electrical improvement, provide design for any recommendation made by the study report. The services during construction is: provide construction assistance, such as review of shop drawings, response to RFIs, attending progress meetings, verifying and assisting GLWA for any changes requested by the contractor, etc.</p> <p>Construction will follow after the completion of design.</p>		
Challenges:	Shutdowns of the pumps to be rehabilitated will require co-ordination with operations and careful planning to meet NPDES permit requirements for the flow capacity during the construction phase.		

Main Raw Sewage Pumps at Pump Station 2

Main Raw Sewage Pumps at Pump Station 2

CIP Number:	211006		
Old CIP No.:	1312		
Project Title:	WRRF PS No. 1 Improvements		
Project Status	Future Planned	<input checked="" type="checkbox"/> Innovation	
Budget:	Wastewater	<input type="checkbox"/> MP Right Sizin	
Classification Lvl 1:	Wastewater	<input type="checkbox"/> System Reliability	
Classification Lvl 2:	WRRF		
Classification Lvl 3:	Primary Treatment		
Review Committee Project Score:	75		
Project Significance:	Inspection of condition of all pumps at pump station and rehabilitation to increase efficiency and reliability		
Project Engineer/Manager:	Alfredo Lava		
Manager:	Ali Khraizat		
Scope of Work:	The study/design work will identify all major parts including impellers and wear rings to be refurbished for each pump and all related appurtenances. The construction services will provide rehabilitation and/or replacement as determined in the study and design along with the sequencing of pump shutdown throughout the rehabilitation period. Investigation and evaluation of all the inlet gates, outlet gates and associated actuators, Motor Control Centers (MCCs) and other related equipment, HVAC system, Control System and provide recommendation and design for rehabilitation or replacement are also part of the scope.		
Challenges:	Maintaining the adequate pumping capacity during construction will be the most significant challenge on this project.		

Pump Station 1 Interior

CIP Number:	212008		
Old CIP No.:			
Project Title:	WRRF Rehabilitation of Intermediate Lift Pumps (ILPs)		
Project Status	New	<input checked="" type="checkbox"/>	Innovation
Budget:	Wastewater	<input type="checkbox"/>	MP Right Sizin
Classification Lvl 1:	Wastewater	<input type="checkbox"/>	System Reliability
Classification Lvl 2:	WRRF		
Classification Lvl 3:	Secondary Treatment & Disinfe		
Review Committee Project Score:	72.8		
Project Significance:	The ILPs are old and reached the end of life cycle. Therefore a replacement or rehabilitation will help to comply with the permit capacity requirement for the Secondary Process Area.		
Project Engineer/Manager:	Beena Chackunkal		
Manager:	Ali Khraizat		
Scope of Work:	Investigation, Study including modeling, design and construction of the five intermediate lift pumps that lift primary effluent to the aeration basins for secondary treatment.		
Challenges:	Maintaining the required wet weather secondary capacity of 930 MGD.		

Intermediate Lift Pump Station N.2

Intermediate Lift Pump Station N.2

CIP Number: **216006**

Old CIP No.: 1381

Project Title: **Rehabilitation of Potable Water, Screened Final Effluent (SFE), Natural Gas, Secondary Water System and Compressed Air Pipelines & SFE Pump Station**

Project Status: Future Planned

☒ Innovation

Budget: Wastewater

☐ MP Right Sizin

Classification Lvl 1: Wastewater

☐ System Reliability

Classification Lvl 2: WRRF

Classification Lvl 3: General Purpose

Review Committee Project Score: 78.6

Significant SFE & Secondary Water Pump Station and pipe corrosion, requiring equipment and building rehabilitation. No redundancy for power supply to SFE pump station. Latest cooling oil test (DGA) indicates potential issues with two 5kV Transformers

Project Significance: The utilities are vital to the operations of the WRRF. The integrity of these systems will be maintained with this project. The SFE Pump Station provides SFE water to many of the GLWA WRRF treatment processes and needs to be completely rehabilitated to maintain uninterrupted supply of SFE water to these processes. The Secondary Water system needs to be relocated or completely refurbished to provide uninterrupted water for fire protection and process applications such as seal water to the pumps.

Project Engineer/Manager: Ali Khraizat

Manager: Ali Khraizat

Scope of Work: This project will include the study, design, and construction for the needed improvements to the SFE and Secondary Water pump stations. This includes required capacity, pumps, strainers, piping, controls, building improvements, and electrical supply. It is possible that the secondary water system may need to be relocated. This will also include a study to evaluate the potential for replacing the secondary water utilization with SFE utilization where feasible and an alternative analysis to the existing carrier water at chlorination/dechlorination facility. The distribution models for both water systems will also be updated. A redundant potable water feed to the WRRF will also be evaluated. The evaluation of all alternatives will include the ability to reduce energy and potable water usage.

This project will also include study, design and construction of the repair/replacement of the aging and corroded pipes, valves and fittings for the Potable Water Supply System, the Natural Gas system, the SFE system, and the Compressed Air System. The As Builts for all the utilities will be generated as part of this project.

CIP Number: **214001**
Old CIP No.: 1285
Project Title: **WRRF Relocation of Industrial Waste Control Division and Analytical Laboratory Operations**

Project Status: Future Planned
Budget: Wastewater
Classification Lvl 1: Wastewater
Classification Lvl 2: WRRF
Classification Lvl 3: IWC

☐ Innovation
☐ MP Right Sizin
☐ System Reliability

Review Committee Project Score: 62.2

Project Significance: Laboratory Optimization, Continued operation of IWC and Lab, lease termination for analytical laboratory, and utilization of available space in WRRF NAB

Project Engineer/Manager: Beena Chackunkal
Manager: Ali Khraizat

Scope of Work: Relocate Industrial Waste Control Division and Analytical Lab to New Administration Building at WRRF. Consolidate the existing Operations Lab with Analytical Lab.

Challenges: Maintaining the laboratory operations during relocation.

Old IWC and Analytical Lab; new one will be built at the location of the WRRF because of Gordie Howe International Bridge Project

Systems Control and Field Projects

[illegible]

Strategy In SCC and Field Project Selection

- Improvement in Reliability
- Increased Resiliency

CIP Number: **222001**

Project Title: **Oakwood District Intercommunity Relief Sewer Modification at Oakwood District**

Project Status: Future Planned

☐ Innovation

Budget: Wastewater

☐ MP Right Sizin

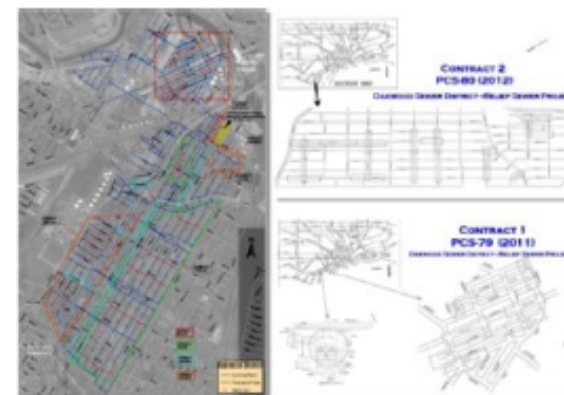

Classification Lvl 1: Wastewater

☐ System Reliability

Classification Lvl 2: Field Services

Classification Lvl 3: Interceptors

Review Committee Project Score: 51.8

Aerial photo, far left, of Oakwood Sewer District depicting previously designed relief sewers tributary to Oakwood Pump Station and CSO Retention Treatment Basin. Part of the planned relief sewers and associated hydraulic structures were constructed betwe

Project Significance: Improvements to the Oakwood District Sanitary Sewer system and implementation of various projects as recommended in report by Applied Sciences, Inc. Dated 2/26/16. Projects to include: 1) Clean & Inspect Trunk Sewers, 2) Analysis and improvement of Oakwood PS/RTB operations, 3) Second influent sewer to Oakwood PS, and 4) NWI Diversion for CSO Control. Projects to be prioritized and validated as part of Wastewater Master Plan Project (GLWA CS-036).

Project Engineer/Manager: Todd King

Manager: Todd King

Scope of Work: The work includes basis of design (study) report on alternative solution to proposed Oakwood District Intercommunity Relief Sewer, diversion of storm water flow, and construction assistance during construction phase of emerging projects. Coordinate with DWSD projects including catch basin restrictions and green spaces.

Challenges: Maintaining the wet weather contract capacities and adequate CSO treatment during extreme storm events and mitigate basement and street flooding in the District and intercommunity regional districts are the most significant challenges for the project to address.

CIP Number: 260200

Old CIP No.: 1263

Project Title: **Sewer and Interceptor Evaluation and Rehabilitation Program**

Classification Lvl 2: Programs

Classification Lvl 3: Programs

Review Committee Project Score:

An example interceptor

Project Significance: Evaluation of the existing condition of the sewers and interceptors, cleaning and rehabilitating are essential to optimize the transportation capacity of the GLWA collection system and to increase its life expectancy.

Project Engineer/Manager: Mini Panicker

Manager: Biren Saparia

Scope of Work: Provide CCTV and or sonar inspection of the GLWA Collection System Interceptors and Trunk Sewers to reveal the existing conditions as per the National Association of Sewer Service Companies' (NASSCO) Pipeline Assessment Certification Program (PACP) standards, evaluate the existing conditions, and provide the necessary cleaning/rehabilitation/replace to optimize the design capacity of the collection system and to minimize the inflow and infiltration into the collection system.

Challenges: Large sewers and interceptors may have flow control challenges for both inspection and rehabilitation.

CIP Number: 260500

Old CIP No.: 1409

Project Title: CSO Outfall Rehabilitation

Project Status: Future Planned

Budget: Wastewater

Classification Lvl 1: Wastewater

Classification Lvl 2: SCC

Classification Lvl 3: Interceptors

Review Committee Project Score: 72.8

- ☐ Innovation
- ☐ MP Right Sizin
- ☐ System Reliability

Sewer tap piping in B009 outfall (left) and sludge buildup and poor masonry in B007 outfall (right)

Project Significance: PROJECTS 222005, 222006 AND 233001 HAVE BEEN INCORPORATED INTO THIS PROJECT. Rehabilitation of the CSO outfalls is essential to properly discharge the uncontrollable combined sewer overflows to the receiving waters and to prevent sewer back up into the Conveyance System. Recent inspections of the outfalls revealed structural deficiencies like fractures, missing mortar from bricks etc. There are sediment and debris deposits in many of them.

Project Engineer/Manager: Mini Panicker

Manager: Biren Saparia

Scope of Work: Preliminary Scope of Work of the project is construction. Contract CS-168 will review the existing records, evaluate the existing conditions, and provide the necessary design to rehabilitate the outfalls.

Challenges: Some outfalls are below the river elevation; rehabilitation may be challenging.

Future Enhancements, Timing and Next Steps

Timing

Review Comments due **January 5, 2017**, however, throughout this process all feedback, comments and suggestions are welcomed!

Date	Description
October 2017	Review Committee Meetings
October 12, 2017	Executive Leadership Team Reviews BCE's & Modifications to CIP
October 24, 2017	Introduce New BCE's & Major CIP Modifications to AM/CIP Customer Outreach Work Group
November 2017	Executive Leadership Team Reviews BCE's & Modifications to CIP
December 15, 2017	First GLWA CIP Committee Review of CIP – Version 1
December 19, 2017	First Customer Review of CIP – Version 1 at Customer Charges Rollout Meeting #1
January 19, 2018	Second GLWA CIP Committee Review of CIP – Version 2
January 23, 2018	Second Customer Review of CIP – Version 2 at AM/CIP Customer Outreach Work Group
January 24, 2018	First GLWA Board Meeting for Review of CIP – Introduction
February 28, 2018	Second GLWA Board Meeting – Proposed CIP Adoption
March 14, 2018	Proposed Alternate GLWA Board Meeting for CIP Adoption
July 1, 2018	Effective Date of 2019-2023 CIP

Future Enhancements

- Project Return on Investment (ROI) Considerations – Future Plans
 - Pilot will be underway in 2018
 - Include Project ROI information in future CIP
- Obtain Project Cost Estimate Classifications – Version #2

It's all about Continuous Improvement

It's a work in progress.....Your feedback is greatly appreciated!

Next Steps

- Water Engineering to Complete Full Project Timing & Resource Review
- Financial Analysis by CFO Regarding Financial Plan Alignment
- Obtain Cost Estimate Classifications
- Gather Input from GLWA CIP Committee
- Gather Input from Customer Members
- Creation of Version 2
- Present to GLWA CIP Committee
- Present to Board with Charges
