Subject: Public Comment to GLWA Board Meeting on March 28, 2018
Date: Tuesday, March 27, 2018 11:50:26 AM

Dear Mr, Freman Hendrix, GLWA water and wastewater systems are finite and thus analyzable. We can know what goes in and what goes out. However, GLWA does not provide reliable data. Without carbon filtration we can not have safe drinking water. Chlorine disinfection produces cancer inducing compounds. The time has come to talk about important issues. Saulius Simoliunas, 665 W. Warren Ave., Detroit, MI 28201, 3134655786, saulius@ieee.org
