EGLE inspection shows that analytical results of total suspended solids violate NPDES permit. This is just a tip of the iceberg. The provided analysts are not chemists, but general help. It is a sore result of DWSD/GLWA decision to layoff experienced chemists five years ago and making sure not to call them back. This casts a big shadow on what is discharged by sewage plant into Detroit River. Saulius Simoliunas, 665 W, Warren Ave, Detroit, MI 48201, 3135645786, saulius@ieee.org
