Subject: PUBLIC COMMENT TO GLWA BOARD MTG. ON JULY 24, 2019
Date: Saturday, July 20, 2019 10:06:38 AM

The real problem to GLWA is its obsolescent system, which in drinking water uses chlorine disinfection without carbon filtration and in wastewater has no tertiary system. Such state of affairs is untenable and cries out for drastic reforms. However, this is denied by GLWA public relations facebook. GLWA has the right to express its opinions, but not outright lies. The dialogue should start between GLWA and citizen scientists and well meaning customers. Saulius Simoliunas, 665 W. Warren Ave, Detroit, MI 48201, 3132 465 5786, saulius@ieee.org
