**Location** Multiple Counties

**Fund and Cost Center**

<b>Project Significance</b>	This CIP provides funds to replace roofing systems that are past their useful service life and thus too costly to repair. Sound roofing systems are important to protect the process infrastructure inside GLWA's buildings.
<b>Scope of Work</b>	This project encompasses the evaluation of all Water Treatment Plant and Booster Pump Station roofs to determine their current condition and to prioritize their repair or replacement. The project will evaluate the type of roof, built-up roofing material, flashing, roof drains/conductors and sealing materials that comprise the building envelope. The findings of the roof survey and evaluation will be used to prioritize roof repair and replacement projects for design and construction.
<b>Challenges</b>	Weather dependent and seasonal work. May require management of several construction projects simultaneously to complete the work. The project should include but, not be limited to the following, material testing for hazardous materials, thermal scans and condition analysis.
<b>Project History</b>	Majority of GLWA Water Plant facilities have Built-Up-Roof (BUR) membranes systems commonly referred as "tar and gravel" roofs. Majority of the more than 70 roofs, are over 15 years old and few are even older up to 30 years old. In many instances, inadequate roof system maintenance has been provided.
<b>Related Project</b>	none
<b>Lookup Driver</b>	1 - Condition
<b>Other Important Info</b>	*Innovation note: use cool roofs
<b>Explanation</b>	Not provided.

**Date Original Business Case Prepared** 8/8/2016

**Year Project Added to CIP** 2017

**Budget** Wastewater

**Class Lvl 1** Centralized Services

**Class Lvl 2** Facilities

**Class Lvl 3** General Purpose

**Location** Multiple Counties

**Fund and Cost Center**

**Project Significance** Some of the roofs at GLWA WRRF facilities are near its end of useful life. The roofs help to protect the expensive equipment by preventing rain water entering through roofs into the facilities.

**Scope of Work** Inspect the roofing system conditions and assess drainage conditions on all the GLWA wastewater related facility buildings. Document the roofing systems inspections by taking and submitting high-quality photographs, scaled drawings, sketches, and inspection notes to adequately describe the conditions and deficiencies of the roofing systems and their drainage facilities. Recommend the extent of the roofing repairs and replacements required. Document the roof for each building inspected on the project. Classify the roofs into three (3) main categories, such as, 1) Roofs that require complete replacement, 2) Roofs that only require repair, and 3) Roofs that require no action within the next 10 years. Develop a recommended implementation/planning schedule with budgetary costs tied to the schedule for roofing system repairs and replacements that GLWA should plan for over the next 10 years. Provide preventative care suggestions for the GLWA's roofing systems evaluated under this contract. Provide any OSHA compliance suggestions that may be applicable for the GLWA's roofing systems evaluated under this contract.

**Challenges** Roof material testing for asbestos before demolition and flashing will be challenge to manage as low levels of asbestos are very common in the GLWA's old roof type systems.

**Project History** Majority of GLWA WRRF facilities have Built-Up-Roof (BUR) membranes systems commonly referred as "tar and gravel" roofs. The old Administration buildings and the Newer Administration buildings have tar and gravel type of roof systems. The CSO RTB's and SDF's have metal and shingle type of roof systems. Majority of the roofs are over 15 years old and few are even older up to 30 years. These roof systems has been maintained through regular maintenance and repair or patch work performed to fix the leaking roof spots.

Roofing Systems Replacement at GLWA WRRF, CSO Retention Treatment Basins (RTB) and

Related Project	CON 143:Complex-II Incineration Building Roof Replacement.
Lookup Driver	1 - Condition
Other Important Info	*Innovation note: Use cool roofs. Complex – II Incinerator (\$1.8M) and Complex – II Dewatering (\$1.0 M) replacement are under consideration to be part of fire remediation project
Explanation	GLWA wastewater roof systems are old and some are near end of its useful life.

**Date Original Business Case Prepared** 8/4/2016

**Year Project Added to CIP** 2017

**Budget** Water

**Class Lvl 1** Centralized Services

**Class Lvl 2** Energy Management

**Class Lvl 3** General Purpose

**Location** Multiple Counties

**Fund and Cost Center**

**Project Significance** Energy savings, demand reduction improved visibility, safety, operational efficiency and worker productivity

**Scope of Work** Remove identified old fixtures and replace with new LED lamps and advanced control systems.

**Challenges** Some outfalls are below the river elevation; installation may be challenging.

**Project History** An audit was completed in 2010/2011 but little action was taken. Advancement in lighting technology since this audit has rendered it obsolete as to recent innovations, technology and cost. Across the system, equipment is in poor condition and exceeds its end of life. Some existing fixtures are antiques and compared to today's lighting, cannot meet minimum lighting standards.

A well detailed audit is to be carried out to determine the best suitable replacement lamps based on a set performance criteria, lighting controls to be incorporated and in cases where delamping might be an option, equivalent/appropriate lighting output and level is to be maintained per task/space requirements

**Related Project** Re lamp of Conner Creek and part of Northeast for safety issues.

**Lookup Driver** 8 - Efficiency

**Other Important Info** n/a

**Explanation** Technology of LED lamps and associated fixtures will reduce electrical operating expenses and improve worker safety.

**Project Significance** The purpose of this proposed contract is to provide implementation assistance and related services on a task order basis to support the GLWA. The services provided under this contract include assistance in capital projects definition and planning, design and construction phase procurement assistance and monitoring; third party contract administration/oversight assistance/scheduling services; claims/changes analysis and resolution; technical training; value engineering (VE) services on selected design projects; develop engineering study reports; identify minimum requirements, scope of work, basis of process design, performance criteria, minimum standards of quality, and preliminary design and oversight services for design/build contracts; proposal analysis assistance; engineering forensic analysis, and additional program support services.

**Scope of Work** This project provides for multi-discipline Engineering services on an "as-needed basis" to support GLWA's Water & Sewer Systems. The purpose of this proposed contract is to provide implementation assistance and related services on a task order basis to support the GLWA. The services provided under this contract include assistance in capital projects definition and planning, design and construction phase procurement assistance and monitoring; third party contract administration/oversight assistance/scheduling services; claims/changes analysis and resolution; technical training; value engineering (VE) services on selected design projects; develop engineering study reports; identify minimum requirements, scope of work, basis of process design, performance criteria, minimum standards of quality, and preliminary design and oversight services for design/build contracts; proposal analysis assistance; engineering forensic analysis, and additional program support services.

**Phase** Study and Design and Construction Assistance

**Contract** CS-166

**Status** Cancelled

**Title** CS-166 WW - Capital Improvement Program (CIP) Implementation Assistance and Related Services

Services on proposed GLWA Contract No. CS 166 will be provided on a task order basis, over a three (3) year period. A task order contract is a contract for services that does not procure or specify a firm quantity of services (other than a minimum or maximum quantity) and that provides for the issuance of orders for the performance of tasks during the period of the contract. The services provided under this contract support GLWA in consistently honoring the commitments it makes to regulatory agencies, customers, and others. The services provided by the consultant will supplement existing GLWA staff or consultant activities, which are focused on procuring and administering contracts for individual capital projects. The consultant secured for this contract will act as an Agent for GLWA. For that reason, the consultant is precluded from bidding/proposing as a prime or sub-contractor on any GLWA projects that the consultant participates in the scope development for the duration of this contract. GLWA Contract No. CS-166 will replace CS-1433, As-Needed Capital Improvement Program (CIP) Implementation Assistance and Related Services, which expired on July 24, 2017. Contract No. CS-189, Job Order Contracting – Project Delivery Assistance, scheduled to expire July 24, 2018, was executed as a short term solution to assure tasks under CS-1433 were completed seamlessly, allowing time to competitively bid the request for services. GLWA required these consulting services contract, to provide specialized expertise in rapid and flexible project delivery methods such as design/build, program management, and job order contracting.

**Project Status** Future Planned

**CIP Type** Program

**Project New To CIP** ☐

Example of an electric meter

**Project Engineer/Manager** TBD

**Manager** Grant Gartrell

**Managing Dept** Energy Management

**Date Original Business Case Prepared** 8/18/2016

**Year Project Added to CIP** 2016

**Budget** Split

**Class Lvl 1** Centralized Services

**Class Lvl 2** Programs

**Class Lvl 3** Programs

**Location** Multiple Counties

**Fund and Cost Center**

**Project Significance** Advanced meters for measuring power usage in real-time to reduce the electrical demands and further optimize load management practices

**Scope of Work** This program will increase the number of electric meters at pumping stations and treatment facilities to allow for active demand management to reduce electricity rates. The meters can be tied to the existing data management system for data archiving and use.

**Project History** Project is in the works targeting high demand (kW) sites - all the water treatment plants (Phase 1)

**Related Project** Completed Adams Road booster station install as a pilot piece

**Lookup Driver**
