Subject: Public Comment to GLWA Board Meeting on Dec. 17, 2020
Date: Sunday, December 13, 2020 10:49:47 AM

This year was marked by COVID 19 crisis. GLWA was dismally missing in action In water and wastewater treatment. Ozone or uv disinfection kill viruses. GLWA stayed with ineffective chlorine disinfection even when Michigan State University researchers found a variety of viruses in GLWA wastewater. This is a call to mobilize citizens to change how business is to be dealt at GLWA . Saulius Simoliunas, 665 W. Warren Ave, Detroit, MI 48201, 313 465 5786, saulius@ieee.org
