## PUBLIC HEARING NOTICE WASTEWATER CONVEYANCE SYSTEM FY 2022 STATE REVOLVING FUND (SRF) PROJECTS

The Great Lakes Water Authority (GLWA) announces a Public Hearing regarding its Project Plan for the proposed In-System Storage Device and Dam and Valve Remote Evaluation and Rehabilitation Project. GLWA will be seeking low interest State Revolving Fund (SRF) loan assistance for FY 2022. The project is comprised of the evaluation and rehabilitation of 29 of the In-System Storage Device (ISD), Dam Remote (DR), and Valve Remote (VR) sites within the City of Detroit. Averaging 20 years in age, the ISD, VR, and DR sites have undergone only minor repairs since original construction. Maintaining reliable ISDs, DRs, and VRs are a key factor in maintaining the GLWA wastewater conveyance system and a major component of mitigating historical problems such as CSO discharges to the Detroit and Rouge River and residential basement flooding. The proposed project will significantly provide upgrades and improve the reliability of the ISD, DR, and VR sites. The total cost of this project is currently estimated at \$10,597,000 which will be allocated to GLWA and suburban customers similar to other collection system capital improvements.

The Public Hearing will present a description of the project, its evaluation, and estimated costs, as well as the cost per household impact for customer communities. The purpose of the hearing is not only to inform, but to gather feedback from people who will be affected. Comments and viewpoints from the public are requested.
