

**GREAT LAKES WATER AUTHORITY
PUBLIC HEARING NOTICE 96-IN WATER TRANSMISSION MAIN
RELOCATION PROJECT
FY 2022 DRINKING WATER STATE REVOLVING FUND PROJECT**

The Great Lakes Water Authority (GLWA) announces a Public Hearing regarding its Project Plan for the proposed 96-inch Water Transmission Main (WTM) Relocation Project. GLWA will be seeking low interest Drinking Water State Revolving Fund (DWSRF) loan assistance for FY 2022. The project is comprised of the relocation of approximately 2.4 miles of 96-inch WTM around the closed G&H industrial landfill (Landfill) located south of 23 Mile Road and west of Ryan Road. The new, relocated 96-inch WTM will connect to the existing water transmission system near the intersection of 24 Mile Road and the Macomb Orchard Trail to the north and at the intersection of Dequindre Road and Hamlin Road to the south. Included in the project is the installation of several isolation valves and the abandonment of a portion of existing 96-inch WTM under the landfill. This project is necessary since the Landfill was placed on the USEPA Superfund National Priorities List in 1983, and approximately 1,660 feet of the existing 96-inch WTM falls within its limits. The total cost of this project is currently estimated at \$170,361,000 which will be allocated to GLWA and suburban customers similar to other GLWA capital improvements. The Project is eligible for participation under the State of Michigan low interest DWSRF loan program. The annual user cost impact per household is estimated at +/- \$9.06 per household.

The Public Hearing will present a description of the recommended project, its evaluation, and estimated costs, as well as the cost per household impact for customer communities. The purpose of the hearing is not only to inform, but to seek and gather input from people that will be affected. Comments and viewpoints from the public are requested.
