

# WHAT DOES YOUR COMPANY NEED?

 **Predictable** costs and lease terms.

 **Established rules** for wear and tear and mileage.

 **Relinquish** responsibility of depreciation.

 **Return vehicles** at the end of lease terms.

WE RECOMMEND

## CLOSED-END LEASE.

A closed-end lease is most like a traditional lease, ensuring your fleet always makes the best impression with the newest vehicles.

 **Flexibility** in lease terms?

 **Separate credit lines** for vehicles?

 **Freedom** from mileage restrictions and wear-and-tear penalties?

 **Opportunity to build equity** in your vehicles?

WE RECOMMEND

## OPEN-END LEASE.

An open-end lease helps you optimize your cash flow by providing flexible funding options, and does not include mileage or wear-and-tear restrictions like conventional leases.

 Flexibility to leverage **strong cash position**?

 Ability to **pay up front**?

 **Total freedom** from mileage or condition restrictions?

 **An alternative to leasing with fleet strategy** and administrative support?

WE RECOMMEND

## SELF-FUNDED FINANCING.

When you self-fund your fleet, you pay up front to gain a strong cash position, while we take care of the rest.
