Hello,

I urge you to not approve the rate increase. Our service charges are already excessive, and I cannot comprehend how this can be justified. I urge you to do everything possible, including reducing expenses and labor costs before considering rate hikes.

Out of my average \$70 water bill, nearly \$60 is from service charges alone! This is absurd. If anything, those using the most water should be paying higher service charges - although I still urge you to vote against the rate increase.

Thank you,

Erik Daly
